User's Manual

Regulatory model: FL-1801H

Avision Inc.

Copyrights and Trademarks

Ethernet is a registered trademark of Xerox Corporation.

Microsoft, Windows 7, Windows 8, and Windows 10 are registered trademarks of Microsoft Corporation in the United States and/or other countries.

Other product names used herein are for identification purposes only and may be trademarks of their respective companies. We disclaim any and all rights to those marks.

Warranty

The information contained in this document(s) is subject to change without notice. The manufacturer makes no warranty of any kind with regard to this material, including, but not limited to, the implied warranties of fitness for a particular purpose. The manufacturer shall not be liable for errors contained herein or for incidental or consequential damages in connection with the furnishing, performance, or use of this material.

Safety Information

When using this equipment, the following safety precautions should always be followed.

Safety During Operation

In this manual, the following important symbols are used:

▲ WARNING:

Indicates potentially hazardous situations, which if instructions are not followed, could result in death or serious injury.

▲ CAUTION:

Indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.

Important:

Indicates operational requirements and restrictions. Please read and follow these instructions to ensure a proper operation and to avoid damage to the machine.

Note:

Indicates further explanation or clarification. Reading this is highly recommended.

\triangle warning:

To avoid hazardous electric shock or fire, do not remove any covers or screws other than those specified in this manual.

▲ CAUTION:

- ✓ To reduce the risk of fire, use only no.26AWG or larger telecommunication line cord.
- \checkmark Disconnect the power plug by pulling the plug, not the cable.
- ✓ Do not touch the metal fingers of the ADF pad module. The edges are sharp and touching them may result in injury.

Precautions

- Do not install the equipment near heating or air conditioning units.
- Do not install the equipment in a humid or dusty place.
- Place the equipment securely on an even, flat surface. Tilted or uneven surfaces may cause mechanical or paper-feeding problems.
- Retain the box and packing materials for shipping purposes.

Federal Communications Commission (FCC) compliance information statement

Part 15

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CE European Union Regulatory Notice

Products bearing the CE marking comply with the following EU Directives:

- Low Voltage Directive 2014/35/EC
- EMC Directive 2014/30/EC
- Restriction of the use of certain hazardous substances (RoHS) Directive 2011/65/EU
- RED (Radio Equipment Directive) (2014/53/EC)

CE compliance of this product is valid if powered with the correct CE-marked AC adapter provide by Avision.

This product satisfies the Class B limits of EN55032, EN55035, and safety requirements of EN62368-1.

*This machine is certified as Class 1 LED product.

*Note the operating temperature for the battery is from -20° to 60° C. And the operating temperature for the product is from 10° to 35°C.

If the operating temperature for the battery is outside the range of $-20^{\circ}\sim60^{\circ}$ C, it may cause cracking, rupturing, bursting, emission of flame or expulsion of molten metal to the outside of the equipment enclosure.

Product Safety Guide

Please clearly read all these instructions, and follow all instructions and warnings before installing and using the device.

The following indications are used in this document to obviate any chance of accident or damage to you and/or the device.

A WARNING	Indicates potentially hazardous situations, which if instructions are not followed, could result in death or serious injury.	
▲ CAUTION	Indicates a potentially hazardous situation which, if instructions are not followed, may result in minor or moderate injury or damage to property.	

- Use only the AC power adapter that came with your device. Using any other AC power adapter could cause fire, electrical shock, or injury.
- Use only the AC power cord and USB cable that came with your device and avoid abrasions, cuts, fraying, crimping, and kinking. Using any other AC power cord and USB cable could cause fire, electrical shock, or injury.
- Do not place objects on top of the AC power cord, and do not allow the AC power adapter or the AC power cord to be stepped on or run over.
- Place the device and its AC power adapter near an electrical outlet where the AC power adapter can easily be unplugged.
- If you use an extension cord with the device, make sure that the total ampere rating of the devices plugged into the extension cord does not exceed the cord's ampere rating.
- Place the device close enough to the computer so that the interface cable can easily reach between the device and the computer.
- Do not place or store the device or its AC power adapter:
 - Outdoors
 - Near excessive dirt or dust, water, or heat sources
 - In locations subject to shocks, vibrations, high temperature or humidity, direct sunlight, strong light sources, or rapid changes in temperature or humidity
- Do not use the device with wet hands.
- Never disassemble, modify, or attempt to repair the AC power adapter, device, or device option by yourself, except as specifically explained in the device's documentation. This could cause fire, electrical shock, or injury.
- Do not insert objects into any opening, as they may touch dangerous voltage points or short-out components. Beware of electrical shock hazards.
- Unplug the device and the AC power adapter, and refer servicing to qualified service personnel under the following conditions:
 - The AC power adapter or plug is damaged.
 - Liquid has entered the device or the AC power adapter.
 - Object has entered the device or the AC power adapter.
 - The device or the AC power adapter has been dropped, or the case has been damaged.
 - The device or the AC power adapter does not operate normally (i.e. appearance of smoke, strange smell, odd noise, etc.), or exhibits a distinct change in performance
- Unplug the device and the AC power adapter before cleaning.

A CAUTION:

- Do not attempt to operate the product in temperature outside the range of -20°~60° C. If so, this may cause cracking, rupturing, bursting, emission of flame or expulsion of molten metal to the outside of the equipment enclosure.
 Note the the operating temperature for the battery is from -20° to 60° C and the operating temperature for the product is from 10° to 35° C.
- Do not locate the device on rackety or aslope tables. Do not locate the device on unstable surface. The device may fall down and this may result in injury.
- Do not place heavy objects on the unit. It may cause unbalance and the device may fall down. This may result in injury.
- Store the AC Power cord/USB cable bundled out of the reach of children to avoid the risk of injury.
- Keep plastic bags bundled out of the reach of children to avoid the danger of suffocation.
- If you are not going to use the device for a long period, unplug the AC power adapter from the electrical outlet.

Disposal of Waste Equipment by Users in Private Union

This symbol on the product or on its packaging indicates that the product can not be disposed of with your other household waste. Instead it should be sent to appropriate facilities for recovery and recycling in an effort to protect human health and the environment. Fore more information about where you can drop off your waste equipment for recycling, please contact your local city office, your household waste disposal service or the shop where you purchased the product.

As an ENERGY STAR[®] Partner, Avision Inc. has determined that this product meets the ENERGY STAR guidelines for energy efficiency.

Introduction

Thank you for purchasing the network scanner. With the product, you can instantly scan single-sided or double-sided document(s) and deliver the electronic images to various destinations including E-mail addresses, ftp servers, network folders such as FTP, FTPS, FTPES, or cloud servers such as Google Drive, Evernote, OneDrive, or Microsoft SharePoint. In addition, the product also allows you to save the scanned image to an inserted USB flash drive, or the product's own memory.

If required, the product can be used as a regular scanner through USB or wired network connection to start a scan with your TWAIN-compliant software application and optimize your scanned images with various advanced image enhancement tool. You may refer to *Chapter 7 Using the Product As a Regular Scanner* in this manual on how to use this function.

Various Scan to Destinations

Scanning and Sending Your Images to an E-mail address:

Connected to an ethernet network and a SMTP server, the product allows you to transmit document(s) to your E-mail as attachment. With a touch of the E-mail key and the selection of your recipients' E-mail addresses, the document(s) is/are first scanned and converted into an image file, and then transmitted to remote recipients within minutes.

Scanning and Sending Your Image to a Cloud server or Network Folder:

The product allows you to send the scanned documents to a server such as Google Drive, Evernote, SharePoint Online or a network folder over intranet with FTP (File Transfer Protocol), FTPS (FTP Secure), FTPES, SharePoint, or SMB (Server Message Block Protocol). This feature off-loads the mail server from handling large attachments.

Scanning and Saving Your Images to a USB Flash Drive:

By plugging a USB flash drive into the USB port of the product, the product allows you to scan your document and save the scanned images to your USB flash drive.

Scanning and Saving Your Images to the Product's Memory:

By selecting a public folder as a filing destination, the product allows you to scan and save the scanned image in the product's memory and access the file from the product's embedded web page.

Preview:

Before sending your documents over the network, the product allows you to view a reduced size of the scanned document to verify if the scanned image has been skew, or upside down. If one of the pages is skew, you can delete and rescan that page to save your time.

Scancast:

Scan and broadcast the images respectively to various destinations including a cloud server, a public folder (the product's memory), a USB flash drive, E-mail addresses, a file server on the network such as FTP \cdot FTPS \cdot SMB.

Using Convenient Shortcuts:

By assigning your frequently used settings and scan to destinations as Shortcuts, the product allows you to streamline your workflow and complete your scanning task in just one press of a button.

Easy Customization:

This product makes user customization fast and easy by simply installing a third-party app (short for application) to be run on the product. The new plug-in app allows users to complete the scan tasks according to its own workflow.

Package Items

- 4. Software CD/Quick Guide
- 5. USB Cable
- 6. Power Adapter & Power Cord

Note:

- 1. Only use the AC adapter DA-48M24 by APD included in the machine. Using other AC adapters may damage the machine and void the warranty.
- 2. Please unpack the packing carefully, and check the contents against the checklist. If any items are missing or damaged, please contact your dealer immediately.

Power Connector	r Connect the AC adapter to the scanner.	
Kensington Security Slot	Attach to a lock to secure the scanner.	

The Side View

Part Name	Function
USB Flash Drive	Used to insert a USB flash drive.

Removable Parts

Pre-installation Information

Preinstallation

The product has to be setup properly on your network to perform E-mail and filing functions. The following network parameters have to be set.

Important!

Make a copy of the following table and ask your Network Administrator to complete the information.

1.	DHCP Enable:			
2.	IP Address:	•		
3.	Subnet Mask:	•		
4.	Gateway IP:			
5.	DNS Server:			
6.	Mail Server:		•	
7.	Port # of Mail			
	Server			

Explanation of contents:

1. *DHCP Enable:	Choose Yes to obtain IP/subnet/gateway/DNS server/WINS server addresses automatically from DHCP server.
2. *IP Address:	The Internet Protocol (IP) address assigned to your machine by your network administrator or by DHCP server.
3. Subnet Mask:	The net mask address assigned by your network administrator or by DHCP server.
4. Gateway IP:	The gateway IP address assigned by your network administrator or by DHCP server or by DHCP server.
5. *DNS server:	The IP address of DNS server assigned by your network administrator.

Note:

- DHCP server: With DHCP (Dynamic Host Configuration Protocol), a host can automatically be given a unique IP address each time it connects to a network--making IP address management an easier task for network administrators. If the DHCP server is available from your network, you do not need to enter TCP/IP, subnet mask, gateway, and DNS information. Instead, this information will be automatically given for the product.
- 2. IP Address: An IP (Internet Protocol) address uniquely identifies a host connection to an IP network. System administrator or network designer assigns the IP address. The IP address consists of two parts, one identifying the network and the one identifying your node. The IP address is usually written as four numbers separated by periods. Each number can be zero to 255. For example, 10.1.30.186 could be an IP address.
- **3.** DNS: Stands for Domain Name System. The DNS server identifies hosts via names instead of IP addresses. If the DNS server is available on your network, you can enter the domain name instead of digits for the IP address.

Frequently Used Buttons on the Touch Screen

The following table lists the frequently used buttons and their functions on the touch panel:

	The [Start] button: Choose to start scanning the document and sending the scanned image to E-mail, Public Folder, USB Flash Drive, or other destinations.	
The [Back] button: Choose to leave current screen and return to previously operational screen.		
	The [Home] button: Choose to leave current screen and return to the main operational screen.	

2 Installing Your Machine

This chapter is specifically targeted to the persons who are responsible for the administration of the product. It is recommended that the administrator read this chapter before installing the machine.

Minimum Configuration Requirements

To use the product as a network scanner, the following configuration is required:

To send E-mails from the product:

- TCP/IP network
- A Mail server

To file document(s) via intranet

• FTP, FTPS, FTPES, or SMB protocol environment

Installing the ADF Paper Tray

1. Hold the ADF Paper Tray and insert two pins to the holes on the top of the scanner as shown.

- 2. Pull out the extension to the length of the document.
- 3. Pull the Output Tray and raise the paper stopper to prevent the paper from falling.

Connecting the Ethernet Cable

- 1. Connect one end of your Ethernet LAN cable to an available port of your Ethernet Hub.
- **2.** Connect the other end to the port marked $\Box \Box$ at the back of the product.

Connecting the Power and Turning on the Machine

1. Connect one end of the power cable to the power receptacle of the product.

2. Connect the other end to an appropriate power outlet.

 Press the [Power] button to turn on the product. The Power LED lights in green and the LCD Touch Panel will be displayed with a Home screen as illustrated.

Note:

If the product will not be used for a long time, press the Power button for 3 seconds to turn off the power. Then unplug the product from the power outlet.

Turning Off the Machine

 Press the **Power** button for at least 2 seconds. A Confirmation dialog box appears.

2. Tap [**Power off**] to turn off the machine or reboot to restart the machine.

Power off		
The machine is going to power off.		
Cancel	ОК	

3. Tap [**OK**] to turn off the machine.

Selecting Your Language

The product provides various languages on the LCD Touch Panel. Choose your desired language to be displayed on the LCD Touch Panel.

1. Press the [**Power**] button to turn on the product. The LCD Touch Panel will be prompted with a Home Screen as indicated.

 On the LCD Touch Panel, tap [Settings]> [Device Management] >[Language] in succession and then choose your desired language. Choice : English, Chinese Traditional, Chinese Simplified, Spanish, Portuguese, Hebrew.

3. Tap [**Save**] to save the setting.

Setting Date and Time

To let the product show current date and time, please set your date and time for the product before using it.

 On the Home Screen of the LCD Touch Panel, tap [Settings]>[Device Management]>[Date] in succession and then set your current date.

- 2. Tap [Save] to save the setting and go back to the previous screen.
- 3. On the [Device Management] screen, tap [Time] to set your current time.
- 4. Tap [Save] to save the setting and go back to the previous screen.

Specifying the Product's TCP/IP Address

To let other devices on the network identify the product, you need to set an IP address for the product. Follow these steps to set an IP address:

1. On the Home Screen of the LCD Touch Panel, tap

[**Settings**]>[**Network**]>[**Wired**] in succession and then set the IP address for the product.

- Check [**DHCP**] if you wish to enable DHCP.
- Check [Static IP] if you wish to specify a static IP address. If [Static IP] is selected, tap the IP Address/Subnet Mask/Gateway
 IP/DNS Server field respectively to bring up the soft keyboard and then enter the relevant values.
- 2. Tap [Save] to save the setting and go back to the previous screen.

Note:

- If the system administrator has chosen DHCP, then the IP address of TCP/IP, gateway, subnet mask, and DNS server will be automatically given.
- When installing the product for the first time, it is recommended that the Administrator retain the default system settings. The settings can be customized at a later date once you are familiar with the operation and functionality.

Specifying the Product's Mail Server

To send the scanned image to a recipient via E-mail, you need first specify your mail server information on the product. Follow these steps to set your mail server:

On the Home Screen of the LCD Touch Panel, tap
 [Settings]>[Network]>[Mail Server] in succession and then set your
 mail server information.

On the **Mail** server option, enter the IP address and port number of your mail server.

- On the **Authentication Method** option, tap **[ON]** to enable it or **[OFF]** to disable it.
- Tap anywhere respectively on the Login Name/Password/Mail Server/ Port# field to bring up the soft keyboard and then enter the relevant values.
- 2. Tap [Save] to save the setting and leave the screen.

Creating Your Address Book

To save the time in typing the E-mail address, you can create your address book to speed up the process.

 On the Home Screen of the LCD Touch Panel, tap [Settings]>[Address Book]>[New] in succession and then enter your address information.

Settings >> Addre	ss Book	2016/08/31/ 16:47		New Contact	
Personal				Name	
nimo_wei	nimo_wei@ abc.com			E-mail Address	
		1	-	Description	
				Cancel	Save

2. Tap [Save] to save the setting and leave the screen.

Creating Your Filing Profiles

To store your scanned image to the network folders, you need to first set up a few network folders including FTP, FTPS, FTPES, Public Folder, SharePoint, or SMB to store the images. You may first check with your System Administrator to make sure that you have the privilge to access these network folders.

 On the Home Screen of the LCD Touch Panel, tap [Settings]>[Filing Profiless]>[New] in succession.

 Refer to the following table to create your Filing Profiles. Tap [Save] after the settings have been made satisfactory.

Item	Description
Profile Name	Enter your profile name.
Scan to	Choose your [Scan to] destination protocol. Choice includes * FTP: //, FTPS: //, FTPES://,
	SMB: \ USB, Public Folder, SharePoint.
	USB : Store the scanned image to an inserted USB
	flash drive.
	Public Folder: Store the scanned image to the
	memory of the product and then access the image via
	the product's embedded web page.
	SMB: Store the scanned image to someone else's
	computer in the network over intranet.
	FTP/FTPS/FTPES/SharePoint: Store the scanned
	image to the network folder over intranet.

Townsh LID!	
Target URL	If FTPS, FTP, FTPES, SMB, or SharePoint is selected,
	enter the URL address. You can either enter a domain
	name or an IP address with the directory path. For
	example, 10.1.20.25/test
Port #	Enter the port number for the [Scan to] server.
Passive Mode	Set your FTP connection mode. Choice: On/Off
	(default: Off).
Login Name	Enter your login name to use the designated folder.
Password	Enter your password to use the designated folder.
File Name	Enter your default file name.
Output Color	Choose your desired default output color for the
	scanned image.
	Choice: *Color, Gray, B/W
Document Side	Choose your desired default scanning side.
	Choice: *1-Sided Face Down, 1-Sided Face Up,
	2-Sided
File Format	Choose your desired default file format for the
	scanned image.
	Choice: JPEG, TIFF (One-Page TIFF), M-TIFF
	(Multi-Page TIFF), PDF (One-Page PDF),
	*M-PDF (Multi-Page PDF), Searchable PDF,
	PDF/A(M-PDF), PNG
	OCR Language (Searchable PDF):
	Choose your OCR language. With the OCR (Optical
	Character Recognition) engine which supports over a
	hundred of languages, your electronic documents can
	be searched and managed more effectively.
Resolution	The resolution is measured in pixels per inch (ppi)
	(sometimes referred to as dots per inch or dpi).
	Higher resolutions result in more detail in the scan,
	slower scanning and in general, greater file sizes. When OCR (Optical Character Recognition) is to be
	performed on a scan, 300dpi should be used for most
	languages except Asian languages. For Asian
	languages, 400 dpi is recommended.
	Resolution: 150 dpi Resolution: 200 dpi
	Note: If you are scanning duplex (two-sided) paper
	in color mode, the max. resolution is 400 dpi.
	Choice: 100 dpi, 150 dpi, *200 dpi, 300 dpi, 400
	dpi, 600 dpi.
*: Factory default

Setting the Plug-In App as the Default User Interface

After installing your plug-in application, you can set the plug-in application to be the default user interface after turning on the machine by the touch panel or the embedded website.

To set the plug-in app as the default user interface on the Touch Panel,

- 1. Tap [**Settings**] on the touch panel and login with default user name and password admin.
- 2. Tap [Plug-in] and then [Set APP as Default UI].

 Enter your application name in the [App Package Name] field and then tap [Save] to complete.

4. Restart the machine. Your application's user interface will be displayed.

To set the plug-in app as the default user interface on the website,

- Open your browser and enter the product's IP address on the URL address. The product's embedded web page will be displayed.
- 2. Login the web page. (default user name and password: admin)
- 3. Choose [App Install/Uninstall] from the Menu option and select the [Set App as Default UI].
- 4. Check the [Enable] option and choose [Update] to complete.

Switching back to the Avision's User Interface

If you want to switch back to the Avision's (factory default) user interface, you can disable your application from the product's embedded website.

To switch back to the Avision's user interface,

- Open your browser and enter the product's IP address on the URL address. The product's embedded web page will be displayed.
- **2.** Login the web page. (default user name and password: admin)
- 3. Choose [App Install/Uninstall] from the Menu option and select [Set App as Default UI].
- 4. Uncheck the [Enable] button and choose [Update] to complete.

Document Loading Tips

Before using the ADF (<u>Auto D</u>ocument <u>F</u>eeder), please make sure that your paper meets the following specifications:

- Document(s) can range in size from 50 x 50 mm (2 x 2 in.) (A8) to 216 x 356 mm (8.5 x 14 in.) (Legal).
- Document(s) can range in weight from 7 to 110 lbs $(27 \sim 413 \text{ g/m}^2)$
- ID cards up to 1.25 mm (0.05 in.) thick
- Plastic cards compliant with the ISO7810 ID-1 type
- Document(s) should be square or rectangular and in good condition (not fragile or worn).
- Document(s) should be free of curl, wrinkle, tears, wet ink, or punch holes.
- Document(s) should be free of staples, paper clips, paper sticky notes.

Fanning Your Document

Note: To avoid occasional multi-feeds or paper jams, please fan your documents and align the top edges before feeding them into the scanner.

1. Hold both ends of the documents and fan them a few times.

- 2. Rotate the documents by 90 degrees and fan them in the same manner.
- **3.** Align the edges of the documents in a step-like pattern (see picture below).

Document Feeding

1. Load the stack of document **face down** with the top of the pages pointing into the feeder.

2. Verify that the paper guides are aligned with the edges of the stack.

Note: The [Paper Width] switch:

If your document width is 216 mm (8.5 in.):

If your document width is 216 mm (8.5 in.), slide the [**Paper Width**] switch **DOWN** to fix your paper guide to conveniently load the letter-size document.

If your document width is larger than 216 mm (8.5 in.):

If your document width is larger than 216 mm (8.5 in.) such as invoices with punch holes, slide the [**Paper Width**] switch **UP** and move the paper guide to the right end to load your documents.

Slide **DOWN** the [**Paper Width**] switch to set your paper width to 216 mm (8.5 in.)

Scanning a Stack of Document with Various Sizes and Weights

When scanning a batch of documents with different sizes and weights, be sure to follow the following guidelines to avoid a skewed image or a paper jam:

• Align the documents **TOP EDGE** first in the sequence of paper size from large to small.

• If two pages are of the same size yet with different weight, arrange these pages in the sequence of paper weight from heavyweight to lightweight.

• Align the edges of the documents by tapping the bottom of the stack against the table top.

• Center these pages in the document feeder and make sure that the edges of page of the largest size slightly touch the Paper Guide.

Scanning and Sending Your Document to E-mail Addresses

Basic Operation

Using the Default Setting

- Load your document in the ADF with the 1st page facing down and the top of the pages pointing to the feeder.
- 2. Press the **E-mail** button on the Home screen. The following **E-mail** main screen will be displayed in the right side.

3. Enter your E-mail address.

- Touch any place on the "To" field (the empty box in the center) to bring up the "Soft Keyboard" to type your email address. Press **Enter** to type the 2nd E-mail address and then click **Return** to return to the **E-mail** main screen.

- **4.** Enter or select CC and BCC address as well, if necessary. Enter the subject of your E-mail via the soft keyboard. If not, the "Default Subject" will be displayed in recipients' E-mail message.
- 5. On the **Basic** screen, check if the document sides, output color, or file format meets your requirements. If not, change the settings to suit your needs.
- 6. Tap the E-mail Options tab to prompt the E-mail Options screen. Type your E-mail message if necessary in the Message field via the soft keyboard, enter the attachment name of the scanned document, and the "Reply to" address if necessary. (For more information about the settings, see the settings description in the next two pages.)
- 7. Tap the **Advanced Settings** tab to prompt the **Advanced Settings** screen. Change the density, contract, quality level, and resolution if the default settings are not satisfactory. (For more information about the settings, see the settings description in the next two pages.)

- 8. Tap the **Layout Adjustment** tab to prompt the **Layout Adjustment** screen. Change original size, and preview if the default settings are not satisfactory. (For more information about the settings, see the settings description in the next page.)
- **9.** Press the [**Start**] button to start a scan.
- **10.** The product starts scanning and the preview image will be displayed.

- 11. On the Preview screen,
 - **Start**: If the scanned image is OK, press the [**Start**] button

() on the touch panel to distribute the scanned image.

- **Remove**: If the scanned image is not satisfactory, tap the [**Remove**] button () to delete the scanned image.
- Insert: You may also insert more pages by taping the [Insert]
 Insert
) button.
- Cancel: If the scanned image is not OK, tap the [Cancel] button
 () to abort the job.
- **12.** In a second, the scanned image will be sent to your E-mail addresses.

Settings Descriptions

Basic	
Item	Description
Document	Choice: *1-Sided Face Down, 1-Sided Face Up, 2-Sided
Sides	1-Sided Face Down: Choose to scan single side of your
	document and make sure the scanning side faces down on the
	document feeder.
	1-Sided Face Up: Choose to scan single side of your
	document and make sure the scanning side faces up on the
	document feeder.
	2-Sided: If your original is a double-sided document, choose
	2-Sided to scan both sides of your document.
Subject	Enter text for your email subject. Up to 64 characters are allowed.
Resolution	The resolution is measured in pixels per inch (ppi) (sometimes referred to as dots per inch or dpi). Higher resolutions result in more detail in the scan, slower scanning and in general, greater file sizes. When OCR (Optical Character Recognition) is to be performed on a scan, 300dpi should be used for most languages except Asian languages. For Asian languages, 400 dpi is recommended.
Output Color	Choose your desired output color for your scanned image. Choice: *Color, Gray, B&W
	Color : Choose Color if you wish to scan a color image for
	your original in color. Gray : Choose Gray image if your original contains actual shades of gray.
	Choose B&W if your original contains only text, pencil or ink sketch.

File Format	Choose the file format for your scanned image. Choice: JPEG, TIFF (One-Page TIFF), M-TIFF (Multi-Page TIFF), PDF (One-Page PDF), *M-PDF (Multi-Page PDF), Searchable PDF, PDF/A(M-PDF), PNG
	 Note: MPDF or MTIFF file format allows you to scan multi-page document and convert it to a single file. PDF file format allows you to save one image page in a single file. JPEG file format is available for Color and Gray images only. TIFF file format is available for B&W images only.
* Factory Defa	ault

E-mail Option	ns
Item	Description
From	Enter the " From " address of your outgoing mails from the product. If an E-mail can not be sent, notification is returned to this address. If the administrator has not set the device's email account in the Mail Server settings, you can enter the email address here. This is the " From " address in your E-mail when you receive an email from the product.
Reply To	Enter a " Reply to " address if you wish to specify a reply address which is different from the "From" address. Up to 60 characters can be entered in the field. To enter the address, you may press anywhere on the "Reply To" field to bring up the soft keyboard to type the address.
Message	Type your email message here. To enter the text, you may press anywhere on the " Message " field to bring up the soft keyboard to type the text.
File Name	Enter the file name for your scanned document without extension. If you have not entered a value in the box, the system will bring you a default file name, image. Using #n #Y#M#D#h#m#s makes file name change as time goes. (n, Y, M, D, h, m, and s represent series number, year, month, date, hour, minute, and second respectively.) For example, type file name: test#n#D will bring your filing file name as test000105
File Separation	Limit the file size of the attachment of each outgoing email to avoid the size limitation from SMTP servers. Use the combo box to select from the list.
	Choice: 5MB/10M/20M/30MB/*Unlimited
* Factory Defa	ault

Advanced Sett	ings				
Item	Description				
Density	7 levels of density are provided to adjust the lightness or contrast of your document. If your original document is too light or too dark, you can use this setting to adjust the scanned image. Choice: Level -3~3. Default value: 0				
Contrast	<section-header></section-header>				
	Contrast: -3 Contrast: 0 Contrast: 3				
	(Normal) Choice: Level -3~3. Default value: 0				
	Adjust the Contrast slider right or left to increase or decrease the contrast.				
Remove Blank Page	If you wish to remove the blank page, you can adjust the sensitivity value to define the threshold. The higher the value, the more the sensitivity.				
Quality/File Size	The options will be available only when "JPEG" format is selected in the Attachment Format option. Choose the quality level of your scanned image. The higher the quality, the larger file size.				
	Choice: *Normal Quality/Small File, Higher Quality/Larger File, Highest Quality/Largest File				
Document Type	Choose your document type. Choice: *Mixed, Photo, Text Text: Suitable for document contains pure text. Photo: Suitable for document contains photos. Mixed: Suitable for common business document with photo or text.				
Multi-Feed Detection	Choose if you wish to enable the Multi-Feed Detection via ultrasonic unit. Ultrasonic Detection allows you to set overlapped document by detecting paper thickness between documents. Choice: On/*Off				
Highlight	Used to adjust the brightness of the entire image. The smaller the number, the higher the brightness. Range: 128~*255

Setttings for Various Mail Servers

When using the Scan-to-Email function, the machine will encounter various setting problems on mail servers and cause the mails to be sent unsuccessfully. This document is intended to help users to solve the settings problems. The following is the setting information for Gmail and Office365.

For Gmail

1. Setting on a Gmail Account

When using Gmail as Mail Server, due to security issues, you will be denied when you log in, and an error code 531534 will be displayed on the machine. There are two ways to solve it. One is to access less security app. The other is to enable 2-Step verification to generate a set of app password for the machine.

(1) Access less security app.

Please first apply a testing account - testxxx@gmail.com and a password – pwdxxx to specify the following settings:

(a) Login Gmail mailbox, enter My Account and then select [Security] and click [Off] from the [Less secure app access] option.

Google Account	Q Search Google Account		0	ш	b
Home Personal Info	Manage devices	Manage third-party access			
 Data & personalization Security 	Less secure app access				
음, People & sharing	To protect your account, apps and devices technology are blocked. To keep your acco matically turn this setting OFF if it's not be	count secure, Google will auto-	\bigcirc		
Payments & subscripti	ons				
(i) About					

(b) Turn on [Allow less secure apps: ON] as indicated.

Then, the machine can directly use the longin password on Gmail server.

(2) Enable 2-Step verification to generate App Password for the machine.

Turn on 2-Step verification:

(a) Click [My Account]>[Sign-in & security]>[Password & sign-in method] in succession and then turn on [2-Step verification] as indicated in below.

1 Inbox (13) - jessie5812: × / G Si → C ▲ 安全 https://myac		******* [<u></u>		4

	Password:		

Note:

Gmail supports non-encryption connection yet you can only send mail to Gmail users. The setting is:Mail Server: aspmx.l.google.comSMTP Port#: 25Authentication Method:off

Refer to https://support.google.com/a/answer/176600?hl=zh-Hant

For Office365

Check if Connection Line is OK

To use office365, you must go through an external line and make sure if connection is OK. The following is how to check if the connection is OK. Take Option1 mail server as an example:

If successful, the following screen will be prompted.

The following link is a link to Office365. It contains informations for various options. This document will explain Option1, Option2 and Office365 mailbox.

https://technet.microsoft.com/en-us/library/dn554323(v=exchg.150).aspx#option2

(a) Option1

 This option can send mail to outside mailboxes such as Gmail or yahoo. This method requires account and password login. The settings are: Authentication: ON Encrypt: STARTTLS Port: 587 Mail Server: smtp.office365.com

Login Name : Network@tw.avision-global.com
Password : refer to Office365Pwd.txt

WebManager			
Menu	Network Settings	•	Update
Information			
General	Wired		Mail
Network

How to import e-mail address from a LDAP Server

1. Configuring Your LDAP Server Setting:

- (1). Open your browser and type the IP address of the device on the URL address. The webpage of the device appears.
- (2). Login the webpage. (default user name and password: admin)
- (3). Choose [Network]>[LDAP Server]>[Authentication LDAP] in succession.
- (4). Enter your LDAP information respectively and then click [**Update**] to complete. Refer to the following example.

Network >> LDAP Server		Update
Email LDAP	Authentication LDAP	
LDAP Server IP or URL:	10.1.90.21	
Port#:	389]
Login Name:	av01935	
Password:	•••••]
Search Root(Base DN):	dc=avision,dc=com,dc=tw	
Search attribute:	cn]
Obtain email address from:	mail	
Search Name from:		
Get Account Name From:	sAMAccountName	
	Ex:sAMAccountName	_

Sending Your Document to a Network Folder, a USB Flash Drive or a Public Folder

Important:

To send your scanned images to a network folder such as FTP, FTPS, FTPES, or SharePoint, you may need to contact your System Administrator to get the correct URL for the specified server. Your System Administrator will also give you access to the site and a valid user login and password.

Basic Operation

Using the Default Settings

- Load your document in the ADF with the 1st page facing down and the top of the pages pointing to the feeder.
- 2. Press the **Filing** button on the Home screen. The following **Filing** main screen will be displayed.

Filing		2020/1/31 09:30
	Basic Advanced Options	Layout Bind Em Carlos
Cloud	Scan to	SharePoint Freq.
Cioda		FTP 1
		Q »
E-mail	Document Sides	Output Color
	F. Down	> B &W >
	File Name	File Format
Filing	Ex:DOC_#Y#M#D#h#m#s#n	Multi-page PDF
rning	Resolution	
}}	200dpi	

- 3. Choose a [Scan to] destination to store your scanned image.
 - Choose **Network** or **Local**.
 - If **Network** is selected, the available network servers including FTP, FTPS, or SharePoint will be displayed at the right box. You may use the **Up-arrow** or **Down-arrow** button to scroll from the list.
 - If **Local** is selected, **USB** and **Public Folder** will be displayed at the right box. If USB is selected, make sure a USB flash drive has been inserted to the USB flash drive port of the product.

If **Public Folder** is selected, the scanned image will be stored in the product's memory. Enter the PIN number (folder name) during scanning and then access the scanned image via the product's embedded web page. (Refer more detailed information on subsequent section - Customizing the Product's Settings via the Embedded Web Page.)

- If desired, enter the file name prefix in the [File Name] field for the 4. scanned document.
- 5. Check if the document side, output color, or file format meets your requirements. If not, change the settings to suit your needs.
- button. The scanner starts scanning your Tap the [Start] (6. document.
- 7. The product starts scanning and the preview image will be displayed.

- 8. On the Preview screen,
 - \Diamond Start: If the scanned image is OK, press the [Start] button (on the touch panel to distribute the scanned image.
 - **Remove**: If the scanned image is not satisfactory, tap the **[Remove]** button (

) to delete the scanned image.

Insert: You may also insert more pages by taping the [**Insert**]

- **Cancel**: If the scanned image is not OK, tap the [**Cancel**] button \bigcirc) to abort the job.
- Enter your user name or password when the Login window appears. 9.
- **10.** In a second, the scanned image will be sent to your specified destination.

Using Special Settings

- Load your document in the ADF with the 1st page facing down and the top of the pages pointing to the feeder.
- 2. Press the **Filing** button on the Home screen. The LCD Touch Panel prompts the following **Filing** main screen.

<u>Filing</u>			2020/1/31 09:30
	Basic Advanced Options	Layout Bind	
Cloud	Scan to Network	SharePoint	Freq.
		FTP	1
E-mail	Document Sides	Output Color	»»
	F. Down		>
	File Name Ex:DOC_#Y#M#D#h#m#s#n	File Format	>
Filing	Resolution 200dpi	>	

- 3. Choose your [Scan to] destination to store your scanned image.
 - Choose **Network** or **Local**.
 - If **Network** is selected, the available network servers will be displayed at the right box. You may use the **Up-arrow** or **Down-arrow** button to scroll from the list including SharePoint, FTP, FTPS.
 - If Local is selected, USB and Public Folder will be displayed at the right box. If USB is selected, make sure a USB flash drive has been inserted to the USB flash drive port of the product.

If **Public Folder** is selected, the scanned image will be stored in the product's memory. Enter the PIN number (folder name) during scanning and then access the scanned image via the product's embedded web page. (Refer more detailed information on subsequent section - Customizing the Product's Settings via the Embedded Web Page.)

- 4. On the **Basic** screen, enter your desired file name and check if document side, output color, or file format meets your requirements. If not, change the settings to suit your needs.
- 5. Tap the **Advanced Settings** tab to prompt the **Advanced Settings** screen. Change the density, contract, resolution, and quality level if the default settings are not satisfactory. (For more information about the settings, see the settings description described in the preceding section – Scanning and Sending Your Documents to E-mail Addresses on page 31.)

- 6. Tap the **Layout Adjustment** tab to prompt the **Layout Adjustment** screen. Change original size and preview if the default settings are not satisfactory. (For more information about the settings, see the settings description described in the preceding section – Scanning and Sending Your Documents to E-mail Addresses on page 30.)
- \bigcirc 7. Tap the Start

button. The scanner starts scanning your document.

8. The product starts scanning and the preview image will be displayed.

- 9. On the Preview screen,
 - \Diamond Start: If the scanned image is OK, press the [Start] button (on the touch panel to distribute the scanned image.
 - **Remove**: If the scanned image is not satisfactory, tap the [**Remove**] Remove

) to delete the scanned image. button (

Insert: You may also insert more pages by taping the **[Insert**] Insert

) button on the bottom of the screen.

- Cancel: If the scanned image is not OK, tap the [Cancel] button \bigcirc) to abort the job.
- In a second, the scanned image will be sent to your specified network 11. folder.

How to Send Your Image to SharePoint

SharePoint (Server) is a web-based platform that your company owns and operates. You can use the web site as a secure place to store, organize, share information from any device through a web browser.

To add a SharePoint server for your filing profile,

- 1. Open your browser and type and IP address of your scanner. An embedded webpage appears.
- Login the page to acess more settings with default user name and password – admin.
- **3.** Click [Filing Profile] and then [New] to create a new filing profile.

Menu	Filing Profiles
Information	-
Device Management	
Network	Action: New Delete Modify
Email Default	Profile Name
a diling licinata a a.	CIFS
Filing Profiles	FTP
Address Book	PublicFolder
Shortcut	FTP 2
Account Management	4/50 I< Age 1 (1 / 1) >>
Firmware Update	
Public Folder	
Import/Export	
Product Key Setting	

- 4. Enter your Profile Name. For example, SharePoint.
- Select [SharePoint] from the [Target URL] field and then type the IP address or domain name of the SharePoint server provided by the IT department of your company as illustrated in below:

1	Filing Profiles Editor	r	Test	Submit	Quit

Sending Your Document to Clouds

Basic Operation

Important:

To send your scanned images to a cloud server such as Google Drive, Evernote, OneDrive, and SharePointOnline, make sure you have the privilege to access the cloud servers. For example you need to create a login name and password first.

Using the Default Settings

 Load your document in the ADF with the 1st page facing down and the top of the pages pointing to the feeder.

2. Press the **Cloud** button on the Home screen. The LCD Touch Panel prompts the following **Cloud** main screen.

Cloud	2020/1/16 10:40
⇒	Basic Advanced Layout Bind Difference Adjustment
	GoogleDrive
Cloud	OneDrive 5
	SharePointOnline

	K [*] ∰ ■ F. Down > B&W >
	File Name File Format Ex:DOC_#Y#M#D#h#m#s#n Multi-page PDF
Filing	Resolution 200dpi

- 2. Choose your desired cloud server to save your scanned images. Choice: GoogleDrive, OneDrive, SharePointOnline, Evernote.
- Check if the document side, output color, or file format meets your requirements. If not, change the settings to suit your needs.

For SharePointOnline, you may enter your desired group site name to store your scanned image. Otherwise, the image will be sent to a default group site name.

4. Tap the **Start** button. The scanner starts scanning and a Preview screen will be prompted.

 () on the touch panel to distribute the scanned image.
 - **Remove**: If the scanned image is not satisfactory, tap the

[**Remove**] button () to delete the scanned image.

- Insert: You may also insert more pages by taping the [Insert]
 (Insert) button.
- Cancel: If the scanned image is not OK, tap the [Cancel] button
 () to abort the job.
- 6. The product begins to upload your scanned images to your specified cloud server.

On the web site of your specified cloud server, you will be required to complete the login and authorization. If successful, your account will be displayed and the scanned image will be stored in the cloud server.

Advanced Operation

Using Special Settings

 Load your document in the ADF with the 1st page facing down and the top of the pages pointing to the feeder.

2. Press the **Cloud cond** button on the Home screen. The LCD Touch Panel prompts the following **Cloud** main screen.

Cloud						20	20/1/16 1	0:40

On the web site of your specified cloud server, you will be required to complete the login and authorization. If successful, your account will be displayed and the scanned image will be stored in the cloud server.

How to Send Your Image to SharePointOnline

SharePoint Online, a platform within Microsoft Office 365, is a cloud-based service provided directly by Microsoft.

To set SharePointOnline Setting:

- **1.** Open your browser and type and IP address of your scanner. An embedded webpage appears.
- Login the page to acess more settings with default user name and password – admin.
- Click [ShortCut]>[New]>[Cloud] in succession to create a new ShorCut to speed up the process.

Menu	2	6

- 4. The scanned image will be delivered to your SharePointOnline Cloud.
- 5. Open your browser and type the IP address/domain name of your company's SharePointOnline server. You can find your image in the SharePointOnline page as shown in below. (Group name: 789, Subfolder: bess)

Creating a Shortcut Button

By setting frequently used scan settings and destinations as Shortcut on the Home screen, the product helps you to streamline your workflow and complete your scanning task in just one single step.

Plus, if the cloud server has been setup as a shortcut button on the main screen, the login name and password will be remembered to save you the trouble of having to enter the information each time you access the cloud server.

To create a Shortcut button,

1. Select your frequently operational mode on the left panel. For example, E-mail. The E-mail screen will be displayed on the right panel.

2. Select your frequently used E-mail address in the [To]/[CC]/[BCC] field.

- 3. On the [E-mail options] screen, type your [From] address.
- Check if any of the scan settings needs to be changed to suit your frequently used E-mail task.

 If the scan settings are satisfactory, tap the [New ShortCut] create your new ShortCut. 6. An [Enter a Shortcut Name] dialog box will be prompted.

Save current settings as a new shortcut			
Please enter a shortcut name:			
Cancel OK			

7. Enter your shortcut name and tap [**OK**]. For example, bess. The new shortcut button will be displayed on the LCD Touch Panel.

Note:

Follow the similar procedure to create your frequently Cloud or Filing destination to be your ShortCut on the LCD Touch Panel.

Using the Shortcut Buttons

To use a Shortcut button,

1. Tap the [**Start**] button of your desired ShortCut button on the touch screen.

- 2. The scanner starts scanning and a preview image will be displayed.
- 3. On the Preview screen,

- **Start**: If the scanned image is OK, press the [**Start**] button () on the touch panel to distribute the scanned image.
- **Remove**: If the scanned image is not satisfactory, tap the [**Remove**]

button (^{Remove}) to delete the scanned image.

- Insert: You may also insert more pages by taping the [Insert]
 (Insert) button.
- **Cancel**: If the scanned image is not OK, tap the [**Cancel**] button to abort the job.
- 4. The scanned images are sent to your specified destination.

Scanning and Broadcasting Your Images

The Scancast (Scan and broadcast) feature allows you to scan a document first and then send to many destinations respectively.

Basic Operation

Using the Default Settings

 Load your document in the ADF with the 1st page facing down and the top of the pages pointing to the feeder.

2. Press the **Scancast Scancast** button on the touch screen. The following **Scancast** main screen will be displayed.

- **3.** If desired, enter the file name prefix in the [**File Name**] field for the scanned document.
- 4. Check if the document side, output color, or file format meets your requirements. If not, change the settings to suit your needs.
- 5. Tap the [**Start**] (button. The scanner starts scanning your document.
- **6.** The product starts scanning and the preview image will be displayed.

- 7. On the Preview screen,
 - Start: If the scanned image is OK, press the [Start] button

) on the touch panel to distribute the scanned image.

• **Remove**: If the scanned image is not satisfactory, tap the

[**Remove**] button (to delete the scanned image.

• Insert: You may also insert more pages by taping the [Insert]

button.

- Cancel: If the scanned image is not OK, tap the [Cancel] button
 () to abort the job.
- 8. If the [**Start**] () button has been selected, the [**Scancast**] window for multiple destinations appears.

4 Setting Up and Managing Destinations

This section provides procedure for the administrator to setup and manage your destinations including E-mail addresses or network folders to distribute the scanned document on the network.

Setting Up Your E-mail Address Book

This section provides procedure for the administrator on how to setup E-mail Address Book. The address book can be setup and managed either through the LCD Touch Panel or the product's embedded web page. This section uses LCD Touch Panel as an example.

Adding a new E-mail Address

Follow these steps to add a new E-mail address.

 On the Home screen of the LCD Touch Panel, select [Settings]>[Address Book] in succession. The E-mail Address Book screen will be displayed.

2. Tap [New] to prompt the [New E-mail Address] page.

ttings >> Addre	ss Book	2016/08/31/ 16:47

nimo_wei	nimo_wei@abc.com	
		1

- **3.** Enter your E-mail address and its description.
- 4. Tap [Save] to save your address and leave the E-mail screen.

Editing a Current E-mail Address

To modify a current E-mail address,

- Repeat Step 1 from the previous section, Adding a New E-mail Address. The [E-mail Address Book] page will be displayed.
- Select the E-mail address which you want to modify from the list and then tap [Edit] to prompt the [Modify E-mail Addresses] page.
- 3. Modify your address information.
- Tap [Save] to save the setting and leave the E-mail screen. Or tap [Cancel] to leave the page without saving any setting.

Deleting a Current E-mail Address

To delete a current E-mail address,

- Repeat Step 1 from the previous section, *Adding a New E-mail Address*. The [E-mail Address Book] page will be displayed.
- Choose the address you want to delete from the list and then choose
 [Delete] to erase the address. A Confirmation dialog box appears to confirm your deletion. Click [OK] to confirm or [Cancel] to exit.

Adding a new E-mail Group

To send multiple addresses simultaneously at one time, you can create address group to speed up the process. Up to 50 addresses can be included in one group and a total of 50 groups can be created in the Address Book.

To add a new E-mail group,

- Repeat Step 1 from the previous section, Adding a New E-mail Address. The [E-mail Address Book] page will be displayed.
- Tap [Group] and then choose [New] to prompt the [Add a New Group] page.
- **3.** Enter your group name and its description.
- 4. Choose the address from the address list and click \rightarrow to add a member to the group.

 Click [Save] to save the setting or [Cancel] to leave the page without saving any setting.

Editing a Current E-mail Group

To modify a current E-mail group,

- 1. Repeat Step 1 from the previous section, *Adding a New E-mail Address*. The [**E-mail Address Book**] page will be displayed.
- 2. Tap [**Group**] and choose the group which you want to modify from the list and then tap [**Modify**] to prompt the [**Modify E-mail Group**] page.
- Modify your group information. Choose the group member you wish to add and then click → to add the new member or click ← to delete an old member from the group.
- Tap [Save] to save the setting and leave the E-mail screen. Or tap
 [Cancel] to leave the page without saving any setting.

Deleting a Current E-mail Group

To delete a current E-mail group,

- 1. Repeat Step 1 from the previous section, *Adding a New E-mail Address*. The [**E-mail Address Book**] page will be displayed.
- 2. Tap [**Group**] and choose the group which you want to delete from the list and then tap [**Delete**] to erase the group.
- 3. A Confirmation dialog box appears to confirm your deletion. Click [**OK**] to confirm or [**Cancel**] to exit.

Setting Up Your Filing Profiles

The section provides procedure on how to setup your Filing Profiles to send your scanned document to a specified network folder. The Filing Profiles can be setup and managed either through the LCD Touch Panel or the product's embedded web page.

Adding a new Filing Profiles

To create a Filing Profiles, follow these steps:

1. On the Home screen of the LCD Touch Panel, select [Settings]>[Filing **Profiles**] in succession. The Filing Profiles screen will be displayed.

FTP_PC	
FTP_NB	N
Filing_NB	4 E
	De

- **2.** Tap [**New**] to prompt the [**New Filing Profiles**] page.
- Enter your Filing Profiles information. Refer to the preceding section, *Creating Your Filing Profile (page 19)*, on how to enter your folder information.
- **4.** Tap [**Save**] to save your setting or [**Cancel**] to leave the screen without saving these settings.

Editing a Current Filing Profiles

To modify a current Filing Profiles,

- 1. Repeat Step 1 from the previous section, *Adding a New Filing Profiles*. The [**Filing Profiles**] page will be displayed.
- Choose the Filing Profiles which you want to modify from the list and then tap [Modify] to prompt the [Modify Filing Profiles] page.
- **3.** Modify your folder information.
- Tap [Save] to save the setting and leave the Filing Profiles screen. Or tap
 [Cancel] to leave the page without saving any setting.

Deleting a Current Filing Profiles

To delete a current Filing Profiles,

- 1. Repeat Step 1 from the previous section, *Adding a New Filing Profiles*. The [**Filing Profiles**] page will be displayed.
- Choose the folder you want to delete from the list and then choose [Delete] to erase the folder. A Confirmation dialog box appears to confirm your deletion. Click [OK] to confirm or [Cancel] to exit.

5 Starting a Scan from Your Mobile Device

With a built-in Wi-Fi module, the scanner is converted into a wireless device. When a mobile device is use, the scanned images can be received from the mobile device.

Making Preparation

To connect the scanner to a wireless LAN, prepare the followings:

• An environment in which a wireless LAN is available

When connecting the scanner to a wireless LAN, you may need information for a wireless access point such as an SSID (network name) and a security key (password). For details, contact your Network Administrator or refer to the manual for the wireless access point.

Attention!

Do not place obstacles that block radio waves (e.g. walls or metal plates) or devices that cause radio wave interference (e.g. cordless phones) within 100 mm of the scanner, or near your wireless access point.

• MB Application

Download the **MB Application** on your mobile device from an application store such as Google Play.

Connecting to A Wireless Network

Connecting to a Wi-Fi network in an AP (Access Point) Mode

In AP (Access Point) mode, your mobile devices and the scanner are connected wirelessly without an additional AP (Access Point) since the scanner itself works as an AP.

- **1.** If you have connected a wired Ethernet cable to the scanner, disconnect the network cable.
- On the Home Screen of the LCD Touch Panel, tap [AP Mode]. In a second, the SSID and IP Address will be displayed.

Avision	P: 10.1.21.208 2017/11/27 10:19	Settings >> Network	
AP		Wireless AP mode	Exit Apply
Mode III III		IP address	192.168.43.1
USB Flash Public Fo		Network SSID	Avision-D6F0F2
AP Mode 200dpi Multi-page PDF Multi-page PDF	»	Security	Disabled •
Settings			

 On your mobile devices, make sure Avision-xxxxxx (xxxxxx indicates the last six digits of the Mac Address) has been selected as your network name (SSID).

Connecting the Scanner to a Wi-Fi Network in a Client Mode

In a Client mode, your mobile devices and scanner are connected wirelessly through an additional AP (Access Point). This mode is also the default wireless mode. AP (Access Point)

Connecting Your Scanner to an Access Point:

Important:

Note the wired and wireless mode can not work at the same time. To connect the scanner in a wireless network, please first disconnect the Ethernet cable connecting to your scanner.

- **1.** If you have connected a wired Ethernet cable to the scanner, disconnect the network cable.
- On the Home Screen of the LCD Touch Panel, tap [Settings]>[Network].
 Make sure that [Wireless Client] is turned on.

Netw	vork	
A	Wired	OFF
?	Wireless Client	ON
	Mail Server Setting	
	Cancel	

 In a second, current wireless networks near you will be displayed as shown below.

5. Select an Access Point and click [Connect] to connect the scanner to a specified Access Point, for example, SMCWBR14S-NL. In a few seconds, if the connection is successful, the IP address and Mac address of the scanner will be displayed as indicated above.

Note:

If your access point is set to not broadcast the SSID, please follow these steps to manually add the SSID name (network name):

 On the wireless page, tap the [More Settings]> button and then choose [Add network]. The [Add network] page will be displayed.

ettings >> Network			
Wireless			
SMCWBR14S-NL Connected	Add network	Add network	
AVISION-206	() WPS Pin Entry	Network SSID	
DSR-500N_1	ati	Security	
DSR-500N_WPA2PSK Secured with WPA2	ath	None	
edimax-n411 WPS available	ili	Show advanced options	
TP-I INK 2 4GHz AC94D9	-1	Cancel	Save

 Enter the Network SSID name and choose the security mode, encryption type, and network key and then tap [Save] to search the wireless network manually.

Your scanner supports the following authentication methods:

Security mode	Encryption method	Key Index
WPAPSK	TKIP, AES, TKIPAES	Х
WPA2PSK	TKIP, AES, TKIPAES	Х

Connecting to a Wireless Access Point Using the WPS Button

You may connect the scanner to a WPS compatible wireless access point by pressing the WPS button on the back of the scanner.

Before You Begin!

To enable the WPS connection of your access point, please refer to the user's guide of your access point.

Perform the following procedure to connect.

 Confirm your wireless access point/router has the WPS or AOSS[™] symbol as shown below.

2. Press the WPS button of your wireless access point. (You may refer to the user's guide of your access point/router for instructions on how to use the WPS button.)

 On the wireless page, tap the [More Settings]> button and then choose [WPS Push Button] for at least 2 minutes.

Add network

DSR-500N_1	lti
DSR-500N_WPA2PSK Secured with WPA2	ath
AVISION-206	aut.

Scanning a Document from a Mobile Device

Make sure that the **MB Application** (Scan App) has been installed on your mobile device. The **MB Application** can be purchased for free from an application store such as Google Play.

1. Enable [Wi-Fi] from [Settings] of your wireless computer, smartphone, or tablet and then choose the same network name (SSID) of your scanner. For example, SMCWBR14S-NL.

2. Tap the **MB** app () on the screen to launch the Scan Application. The main window will be displayed and the application will automatically search a scanner in the same wireless LAN. If successful, [**Start scan**] will be displayed at the bottom as shown below.

150 DPI	AUTO SIZE		Duplex	Color]
		No Gla			
		No file	S		
	s	tart sc	an		

ATTENTION:

If the scanner is not found, please check the

followings:

- 1. The scanner is not ready yet. Tap [More Settings] and then [Search scanner] to search the scanner again.
- 2. Check if the mobile device and the scanner are in the same wireless LAN.

3. Check if the default settings meet your requirements. If not, change the scan settings to fit your specific scanning task.

Item	Description
200	Resolution: Select your desired resolution. The higher
DPI	resolution, the greater the image quality and disk space.
	Choice: *150, 200, 300 dpi
AUTO	Scan Size: Select your paper size or you may choose Auto
SIZE	to let the scanner detect your document size automatically.
	Choice: *Auto size, A4, LTR (Letter), LGL (Legal), 4x6,
	5x7
JPEG	File Format: Select the file format for your image.
	Choice: *JPEG, PDF, TIFF
	 Note: The JPEG file does not support the B&W image. The TIFF file format supports only the B&W image.
	Select to scan the front side (simplex) or both the front side
	and the rear side (duplex) of your document.
	Choice: *Simplex, Duplex
	Note: The duplex mode is available to scan from the auto
	document feeder only.
	Color Mode: Select your desired image mode.
	Choice: *Color, B&W, Gray
* Default	settings

- **4.** Load a page to the auto document or place a page on the flat bed.
- **5.** Tap the [**Start scan**] button. (Choose your scanner if there is more than one scanner connected to the network). In a second, the scanner begins scanning the document and the thumbnail scanned image will be displayed.

6. Tap the thumbnail image to view the entire image.

6 Customizing the Product's Configurations

This chapter is specifically targeted to the persons who are responsible for the administration of the product. It is recommended that the administrator read this chapter before installing the machine.

The product's configurations can be customized via the LCD Touch Panel. In addition to using the touch screen, the product allows the administrator to remotely configure the machine by launching the product's embedded web page. How to customize the product's configurations via these two methods will be described in the following sections.

Note:

When installing the product for the first time, it is recommended that the Administrator retain the default system settings. The settings can be customized at a later date once you are familiar with the operation and functionality.

Customizing the Product's Configurations by the Touch Screen

Press the [**Settings**] button on Touch Screen. Please login with the default user name and password – [admin]. The [**Settings**] screen will be displayed as indicated. (The password can be changed later in the web page.)

These 8 buttons displaying at the top are: General, Network, E-mail Default, Filing Default, Filing Profiles, Address Book, ShortCut, and Service Mode. For details on each setting, please refer to the subsequent section, Summary of the Product's Configurations.

Customizing the Product's Configurations by the Product's Web Page

- **1.** Open your browser.
- **2.** Type the IP address of the product in the URL field of your browser and then press Enter. The product's embedded web page appears.

Firmware Update: Obtain the latest firmware file from the web site (www.avision.com) first. And then click [**Browse**] to find the file on your computer. Finally click [**Update**] to update the latest firmware to the product.

Configurations Customized Only Via the LCD Touch Screen

There are some activities which can be set only through the LCD touch screen, for example, the service mode. The service mode is set to provide saving system log file, updating firmware for quick troubleshooting your problems.

Accessing the Service Mode

To access the service mode,

- 1. On the product's LCD screen, choose [**Settings**] and then [**Service Mode**].
- 2. The Service Mode screen will be displayed with following options: [FW

Updated], [Reset to Default], [Run-in Test], and [Save Log].

FW Updated:	Follow these steps to update the firmware:	
	 Locate the latest firmware file from the web site (http://www.avision.com). 	
	2. Store the firmware file on your removable USB disk.	
	3. Plug the removable USB disk into the USB disk port of the machine.	
	 Tap [FW Updated] to update the firmware file. 	
Reset to Default:	Choices include [Reset Admin], [Reset Network Settings], [Reset Admin and Network], [Reset to Factory Default].	
	Reset Admin: Reset the login user name and password of the product's web page.	
	Reset Network Settings: Reset the network settings to factory default.	
	Reset Admin and Network: Reset both the login information and the network settings to default.	
	Reset to Factory Default: Reset all configurations to factory default values.	
Run-in Test:	For internal use only.	
Save Log:	Plug a removable USB disk into the USB port of the machine and tap [Save Log] to save system log file.	

Adjusting Brightness

To adjust brightness on the LCD screen, follow these steps:

- On the product's LCD screen, choose [Settings] and then [Device Management].
- 2. Tap the [**Brightness**] option and move the scroll bar to the right to increase your brightness or to the left to decrease your brightness of the LCD screen.

Selecting Language

To select the language, follow these steps:

- On the product's LCD screen, choose [Settings] and then [Device Management].
- Tap the [Language] option and select your language display on the LCD screen. Choice: English, Chinese Traditional, Chinese Simplified, Spanish, Portuguese, and Hebrew.
- 3. Tape [**Save**] to save the settings.

There are some activities which can be set only through the product's web page. For example, some options on [**Device Management**], [**Import/Export**], and [**Public Folder**]. How to use these options will be described in the following sections.

Exporting and Importing System Data

To easily manage several AN360W in the network, the machine provides a useful feature to allow system administrator to export the system data of one AN360W into a file and then import this data to other AN360W in the network.

For example, the address book, Filing Profiles, and default systems settings of one AN360W can be first exported to a file as a backup and then import these files to other AN360W.

Follow the procedure described in below to export and then import your system data.

To export system data,

- 1. On the product's web page, choose [**Import/Export**].
- Choose the system data you want to export. Choice: Address Book, Filing Profiles, Settings (Device Management, Account Management, Mail Server/LDAP Server, E-mail Default, Filing Default).
- Choose [Export Now]. The selected system data will be exported into a file. If [address book] is selected, an AN360W_addressbook.csv file will be generated. If [Filing Profiles] or [settings] is selected, an AN360W_profile.json or AN360W_setting will be generated...
- 4. Save the exported file into your computer as a backup.

To import system data,

- 1. On the product's web page, choose [**Import/Export**].
- Choose the system data you want to import. Choice: Address Book, Filing Profiles, Settings (Device Management, Account Management, Mail Server/LDAP Server, E-mail Default, Filing Default).
- 3. On the Importing option, choose [**Browse**] to locate the system data which you have been previously exported.
- 4. Choose [**Import Now**] to start importing the system data to your machine. The current system data will be overwritten.

Accessing the Public Folder

The machine allows you to save the scanned image temporarily to the product's memory and then access the scanned image through the product's web page. To access the scanned image, follow these steps:

To access the scanned image,

- 1. On the product's web page, choose [**Public Folder**].
- 2. A Pin number dialog box appears. If desired, enter your pin number to access the public folder.
- 3. Choose your scanned file on the [**Public Folder**] and click [**Download**] to download the file to your computer.

Note: The scanned images can be saved on the product's memory for 24 hours only. After 24 hours, the image files will be automatically deleted.

7 Using the Product as a Regular Scanner

Installing the Scanner Driver

NOTE:

1). To ensure your computer can identify the USB scanner, please install scanner driver first before connecting the scanner to your computer.

2). The scanner driver contains TWAIN, ISIS and WIA driver. After the installation of scanner driver is completed, this scanner allows you to scan via a TWAIN, ISIS, or a WIA interface. Start your TWAIN-compliant image editing software application to select a TWAIN or WIA user interface or your ISIS software to select an ISIS user interface. You may also launch Microsoft's Scanner and Camera Wizard to scan via a WIA user interface.

- **1.** Place the supplied CD-ROM onto your CD-ROM drive.
- 2. The software installation graphic appears. If not, run "setup.exe".

Contents on the installation graphic:

- **Install Scanner Driver:** To communicate with your scanner, you need to install the scanner driver.
- **Install Button Manager V2**: To use the [BM2 Air] function, you need to install Button Manager V2. To ensure Button Manager V2 works properly, please FIRST install scanner driver before installing Button Manager V2.
- **Install Virtual Scanner Link**: To connect your computer to the scanner in the network, you need to install the Network Setup Tool.
- **Install AVScan X:** To scan and organize your multi-page document(s), you can install the software application to manage them easily and effectively.

- **View Manual:** Click "**View Manual**" to view or print the detailed user manual for the scanner and Button Manager V2 respectively.
- Click Install Scanner Driver to install the scanner driver and then click Install Button Manager V2 to install the Button Manager V2 unto your computer.

Connecting to the Computer

Via a USB Cable

1. Connect the **square end** of the USB cable to the USB port of your scanner. Connect the **rectangle end** to the USB port at the rear side of your computer.

Note: The scanner is designed with a USB 3.2 GEN 1X1 interface to ensure the optimal speed. If your computer comes with a USB 3.2 GEN 1X1 port, make sure to connect the scanner to your computer to the USB 3.2 GEN 1X1 port which is distinguished in blue color at the back of your computer. The USB 3.2 GEN 1X1 port enhances your scanning speed and is also compatible with USB 2.0 and USB 1.1.

- 2. The computer should detect a new USB device and prompt a "New Hardware Found" message.
- **3.** By following the on-screen instructions, click the **Next** button to continue. When the certification screen appears, click **Continue Anyway** to complete the installation.
- **4.** When the **Finish** dialog is prompted, click the **Finish** button.

Via a Wired Network

- **1.** Connect one end of your Ethernet LAN cable to an available port of your Ethernet Hub.
- **2.** Connect the other end to the port marked $\Delta \Delta$ at the back of the product.

Connecting to the Network Scanner

Before connecting to the network scanner, make sure that Virtual Scanner Link (Network Setup Tool) has been installed onto your computer. The Network Setup Tool is included in the supplied software CD.

 Start [Virtual Scanner Link] by choosing Start>All Programs>Avision Virtual Scanner>Virtual Scanner Link. The main window will be displayed and the scanners in your network will be searched automatically. In a few seconds, the result including the scanner model and scanner's IP address will be displayed as shown.

intual Sc	anner Link		Refresh	Settings
Avision	ANxxxx	Avision-7E5C	2C18AE657E5C	<u>10.1.23.22</u>

2. Choose the scanner you wish to connect and then press [**Connect**]. If connection is successful, a connection mark will be displayed as shown.

3. After the scanner has been connected successfully, launch your TWAIN-compliant image-editing software application to start a scan.

Note:

- The network scanner can be used by one user at a time. If the network scanner is being used by other user, you will be prompted with a message to connect the scanner later. When the scanner is available, you will also be prompted with a message to connect the scanner and start scanning your document.
- If the network scanner has not been found, it is probably the scanner and your computer are not in the same LAN. In this case, you can assign a specific IP address of the scanner to let [Virtual Scanner Link] automatically search the scanner. Click the [Option] button, type your IP address on the [Searching Address] field (1), then click the [+] button (2) and finally click [OK] (3) to complete.

🥔 Options		-	×
Settings	Language:	English 💌	
About	Searching Time:	5	(5~20 sec.)
(1)	Searching Address:	10 . 1 . 23 . 47	+ (2)
	(3)	OK Cancel	

- Searching Time: When the program is launched, it automatically searches the scanner in the network in 5 seconds (default). The searching time can be changed from a range of 5 to 20 seconds.
- If the [Virtual Scanner Link] program has been closed and then launched again, [Virtual Scanner Link] will automatically search and connect the network scanner it has previously connected to.

Verifying Your Scanner Installation

To verify if your scanner installation is correct, Avision provides you a useful test program called Avision Capture Tool. With this tool, you can perform simple scans and view the captured images. In addition, it helps you complete your scan at a rated speed.

The following procedure describes how to verify your scanner installation. If the installation is not correct, please review the preceding section to check if the cable connection and scanner driver have been successfully installed.

Before you begin, be sure the scanner is on.

1. Select Start>Programs>Avision xxx Scanner>Avision Capture Tool. The Select Scanner Model dialog box will be displayed.

Driver Type:		
TWAIN		
Scanner Model:		
Avision xxx	~	
		OK

2. Select your driver type and scanner model and click OK. The following Avision Capture Tool dialog box will be displayed.

- 3. Choose your desired file format from the File Format drop down list box. (Default is JPEG, other choice includes TIFF, MTIFF, PDF, MPDF, GIF, and BMP.) The supported file formats vary depending on your scanner model.
- 4. Type your desired folder name and file name in the File Path box. (Default is C:\Documents and Settings\User Name\My Documents\My Scan\Image.)

Note: If you do not wish to save the scanned image, deselect the Save button since default is Save Enable. In this case, the thumbnail view will be disabled. And therefore, after viewing all the scanned images, only the last one will remain on the screen.

5. Click the Setup button (or choose Setup from the File menu to prompt the Scanner Properties dialog box.

	Scanner Properties

	Same settings for both sides Scan Source: Auto Document Feede Profiles Contom	r v v

- 6. From the Image Selection Box, choose your desired image type for your scanned image. (Default is Front B&W) If you have a duplex scanner, choose Front and Rear to scan both sides of your document.
- 7. Click OK to quit the Scanner Properties dialog box. (To learn more details about the Scanner Properties dialog box, please see the subsequent chapter, *Using the Scanner Properties Dialog Box*.)
- 8. Place your document face down on the document glass or face up in the auto document feeder.
- 9. In the Scan Validation dialog box, click the Scan button (Scan) or choose Scan from the File menu.
- 10. The document will be scanned and displayed in the Scan Validation screen. After the scanned images have been displayed, your scanner installation verification is completed.

- 11. You can view the scanned image in Fit Page () or Actual Size (100%) button () from the Viewing toolbars at the right side.
- 12. Click the Close box or Quit from the File menu to exit the Scan Validation Tool.

A Glance of the Scanner Properties Dialog Box

1. Tab Options	Choice: Image, Compression, Color Dropout, Paper, Multi-Feed Detection, Preview, Options, Settings, Information.
2. Image Selection Box	Choose your image type and the side of document you wish to scan. Options vary based on type of scanner.
3. Brightness	Adjust the brightness level from -100 to $+100$.
4. Contrast	Adjust the contrast level from -100 to $+100$.
5. Resolution	Determine the quality of the scanned image. The industry standard is 200 dpi.
6. Invert	Reverse the color of your scanned image.
7. Scan Source	Choice: Auto Document Feeder, Flatbed, Flatbed (Book), Automatic (varies due to different scanner model)
8. Defaults	Reset all values on the tabs to the factory default settings.

8 Using the Scanner Properties Dialog Box

The Scanner Properties dialog box allows you to configure the scanner's settings. It consists of several tabbed windows each of which will be described in this chapter.

Note: In this chapter, all options are available based on a duplex (double-side) scanner. If you have purchased a simplex (single-side) scanner, all options are available for single sided only.

Showing or Hiding Tabs

The [**Scanner Properties**] dialog box is displayed in default with three basic tabs - Image, Paper, and Information. To show more tabs, click the [**Scanner Properties**] icon to access more scan settings.

To show more tabs,

- 1. Click the [Scanner Properties] icon () on the upper left corner, and choose [Tab] to show available tab names. The available tabs include Compression, Color Drop out, Preview, Rotation, Separation, Multi-Feed, Options, Settings, and Imprinter. (Note: the options vary based on scanner model.)
- 2. Choose the tab you want to display. The selected tab will be shown with a check mark and then displayed in the [**Scanner Properties**] dialog box.
- 3. To access the settings, click the selected tab on the top of the [**Scanner Properties**] dialog box. The page of the selected tab will be displayed.

To hide a tab window,

- 1. Click the [**Scanner Properties**] icon (**Sec**) on the upper left corner, and choose [**Tabs**] to show available tab names.
- 2. Choose the tab you want to hide. Then, the selected tab will be hided in the [**Scanner Properties**] dialog box.

Note: The [**Image**], [**Paper**], and [**Information**] tab can not be hided since they preprogrammed to be displayed by default.

The Image tab allows you to choose the front side and (or) the rear side of your document, the type of image, and to set several basic scan settings. Note that except for the resolution, you can set individual scan settings for the front side and the rear side. For example, all settings in the Image tab, Compression tab, Color Dropout tab can be set individually for the front and the rear side. However, the settings in the Paper tab, the Option tab, and the Setting tab have to be set the same for the front and rear side.

The Image Selection Box

Front Auto Color Detection

Front Gray

Front B&W

Rear Auto Color Detection

Rear Color

Rear Gray

Rear B&W

The Image Selection box includes the image type and document side option. If you wish to scan both the front side and the rear side of your color document, you can check both Front Color and Rear Color at the same time. Note the options vary based on type of scanner.

Example 1 : Scanning a two-sided color document, both sides in color

Example 2 : Scanning a two-sided color document, one in B&W, the other in color

Image Type	Description
Color	Choose Color if you wish to scan a color image for your original in color.
Gray	Choose Gray image if your original contains actual shades of gray.
B&W	Choose B&W if your original contains only text, pencil or ink sketch.

Front/Rear Auto Color Detection:

Click to automatically detect and scan the front or the rear page of your color document in color image mode. If your document is in colors, the scanner will automatically scan the document into a color image. If your document is non-color, you can choose the output to be either B&W or Gray from the Non-Color Selection option. This option is useful when you have a mixture of color and non-color document.

Note: If you choose Front Rear Auto Color Detection, you can not specify the image mode of your rear page and vice versas.

Modes of Auto Color Detection:

If [**Front/Rear Auto Color Detection**] is selected, its modes will be displayed. **Choice includes Normal, Ignore paper color.** For paper with background color such as invoices, choosing [**Ignore paper color**] will automatically remove the background color and enhance the detection accuracy.

Sensitivity of Auto Color Detection

If your documents contain primarily B&W text and small amount of light or pale colors and you do not wish them to be recognized as color image to save the file size, you can increase the sensitivity value by moving the bar to the right to let these images to be detected as B&W. The value ranges from 1 to 100. The default is 37.

Original

Same settings on both sides:

Click to apply same scan settings for both sides of your documents. After checking this option, any settings you have changed will automatically applied to both the front side and the rear side. For example, if you choose your ideal resolution to be 300 dpi, this will be applied both to the front side and rear side of your document.

Other Image Options

BinarizationThis is the process of converting a grayscale or color image to
a bi-tonal image. There are several different methods of
performing this conversion. Options: Dynamic
Threshold, Fixed Processing, Halftone 1~5, Error
Diffusion.

Dynamic Threshold: Selecting **Dynamic Threshold** allows the scanner to dynamically evaluate each document to determine the optimal threshold value to produce the highest quality image. This is used to scan mixed document containing faint text, shaded background, or color background with a single setting. If Dynamic Threshold is selected, Threshold, Brightness, and Contrast are not available.

Dynamic Threshold (AD): Selecting Dynamic Threshold(AD) to perform the enhanced mode of the DynamicThreshold feature. However, using this mode may slow down your scanning speed.

Sensitivity of Dynamic Threshold

Occasionally your scanned image may contain small dots or speckles. To remove these spots, increase the sensitivity value by moving the bar to the right. The value ranges from 1 to 30. The default is 20.

Fixed Processing: Used for black-and-white and other high contrast documents. A single level is set to determine the black-and-white transition. The threshold is programmable over the entire density range. **Fixed Processing** sets Contrast to 0. If **Fixed Processing** is selected, Contrast is not available.

Halftone: In addition to the black and white display, Halftone can present a somehow gray shade of image by using different size of dots. Halftone image looks like the picture we have seen in the newspaper. Options include Halftone 1, Halftone 2, Halftone 3, Halftone 4, Halftone 5.

Error Diffusion: Error Diffusion is a type of Halftone. Error Diffusion gives good image texture and makes text in images more readable than Halftone.

Error Diffusion Image

Threshold Used to convert a grayscale image to a bi-tonal image. The value ranges from 0 to 255. A low threshold value produces a lighter image, and can be used to subdue backgrounds and subtle, unneeded information. A high threshold value produces a darker image, and can be used to help pick up faint images.

Adjust the threshold setting by dragging the Threshold sliding bar to the left or right to achieve the desired threshold setting.

200 dpi, Threshold:50, Brightness: 0

200 dpi, Threshold:100, Brightness: 0

Gray

Document Type: Choice: Normal, Photo, Document

Three options of document type are provided when you choose Gray as the image

type for your scanned document. Choice: Normal, Photo, Document.

- **Document:** Choose Document if your original contains pure text or a mixture of text and graphic since it is an optimal setting for regular business document. When using Document, only Threshold can be adjusted.
- **Photo:** Choose Photo if your original contains photo to reproduce your photo in vivid grayscale image. When using Photo, no Threshold and Contrast can be adjusted.
- **Normal:** When using **Normal**, Threshold, Brightness, and Contrast can be adjusted.

Threshold: The value ranges from 0 to 255. The default is 230. A low threshold value produces a lighter image, and can be used to subdue backgrounds and subtle, unneeded information. A high threshold value produces a darker image, and can be used to help pick up faint images. Adjust the threshold setting by dragging the **Threshold** sliding bar to the left or right to achieve the desired threshold setting.

ResolutionA good control of the resolution results a
good detail of an image that scans. The
resolution is measured by dots per inch
(dpi). Normally, the greater the dpi
number, the higher the resolution and
the image file size. Be aware that
greater resolution takes more time to
scan, and more disk space for the
scanning image. For your information,
an A4 size color image scanned at 300
dpi at True Color mode consumes

approximately 25 MB of disk space. A higher resolution (usually means over 600 dpi) is only recommended when you need to scan a small area at True Color mode.

Choose a resolution value from the drop down list. The default value is 200 dpi. Available resolutions are 75, 100, 150, 200,300, 400 and 600. Or you may choose your desired value by clicking the box in the right side of the drop down list and press the arrow key to select your desired value and then click the Add button to include it in the drop down list. **Note:** The resolution is up to 300 dpi if an imprinter or a MICR reader is installed or connected to the scanner.

Resolution: 75 dpi

Resolution: 150 dpi

Invert Reverses the brightness and the colors in the image. The default setting is Black on a White background. Reverse mode is White on a Black background. For color images, each pixel will be changed into its complementary color at the command of Invert.

"I am not worthy to have you enter my

s that is God, I beg all my brothers — those w e who work manually, clerics and lay brothers ards being humble in all things; not to glorify r to become interiorly proud because of good w sometimes says or does in them or through the "Do not rejoice... in the fact that the de ord: : 10:20) Let us be firmly convinced of the fact

White on Black

Scan **Choice:**

Source

- **Auto Document Feeder:** Used to scan multiple pages.
 - Flatbed: Used to scan a single page. For example, pages from • newspaper clipping, paper with wrinkles or curls.
 - Flatbed (book): Used to scan several inside pages from book.
 - Automatic: Allow the scanner automatically set its scan If Automatic is selected and there is document in source. both the auto document feeder (ADF) and the flatbed, then the scan source will be automatically set to ADF. If Automatic is selected and there is document only in flatbed, then the scan source will be set to flatbed.

Merge Two Sides into One Image:

If you have a sheet-fed duplex scanner with front input tray, you can scan an A3 size document with an innovative method. Thus, fold your A3 size document into A4, and then load the paper in the front tray. Choose Merge Two Sides from the Scan Source option and then the scanner is able to scan both sides of your document and merge two A4 images into one A3 image.

When you select Merge Two Sides into One Image, the Cropping

or Multi-feed function will be disabled.

Note: This feature must be used with a carrier sheet. Regarding

how to load a document with a Carrier Sheet, refer to Section

4.6.2, Other Paper Selection.

Note the options vary based on type of scanner.

If "Merge Two Sides into One Image" is selected, its choice will be available including "Merge Horizontally", "Merge Vertically", "Merge Vertically (Back Side Flip)". If the reverse side of your document is upside down, choose "Merge Vertically (Back Side Flip)" and the back side will be automatically rotated 180 degrees and merged.

Merge Vertically Merge Horizontally

Note the options vary based on type of scanner.

Color The purpose of Color Matching is getting the accurate color. This

Matchingoption uses the default parameters (ICC profile) to adjust the
colors of the image.

Choice: None, Document, Photo

- None: Choose "None" to disable this option.
- **Document:** Choose "Document" if your original contains pure text or a mixture of text and graphic since it is an optimal setting for regular business document.
- **Photo:** Choose "Photo" if your original contains photo to reproduce your photo in vivid color image.

Editing Profiles

The Scanner Properties dialog box allows you to change and save your frequently used scan settings into a profile. You can edit these profiles by renaming or deleting them.

To add a new profile,

- 1. Customize your settings. (For example, change your resolution, image type, cropping method, scan size, or other scan settings.)
- 2. Click the Image tab and then choose "Profiles" to prompt the "Edit Your Profile" dialog box.

Scanner Properties						
Paper Setting Informat	an Binarization:	Dynamic Threshold

- 2. Choose the profile you want to rename from the dropdown list box and then click the Rename button.
- 3. Enter new name for the profile.

Rename a Profile	×
Please enter the new	v name of the profile:
Original Name:	Betsy
New Name:	
	Save Cancel

4. Choose "Save" to save the new profile or "Cancel" to quit.

Note:

The preset default profiles include Flatbed, Simplex-B&W, 200 dpi, Simplex-Gray, 200 dpi, Simplex-Color, 200 dpi, Duplex-B&W, 200 dpi, Duplex-Gray, 200 dpi, Duplex-Color, 200 dpi. If you have a simplex or a sheetfed scanner, the duplex or the flatbed option will not be available.

The Compression Tab

The Compression tab allows you to compress your scanned image and choose the level of compression. Bi-tonal images are normally compressed using CCITT standard called Group 4 (G4). Color and grayscale images are often compressed using JPEG technology. Move the **JPEG Quality** slider to the right or left to increase or decrease the level of compression. Note the greater the compression level, the lower image quality. Default is 50%.

Note that the compression depends on your image editing application. If your image editing application does not support the type of compression format, then either a warning message will appear or the image quality of the compressed file will not be acceptable.

JPEG (Joint Photographic Editor Group). This group developed and lent their name to a file compression standard for color and grayscale images that is widely used by scanners, and software applications. On Microsoft Windows-based systems, a file with the extension .jpg has normally been compressed using this standard.

For scanning color or gray images, the following compressions are available:

- None
- JPEG

For scanning B&W images, the following compressions are available:

- None
- G4

Compression:

To complete your scan at a rated speed, the scanned image is compressed by default during transmission. However, if you wish to obtain the highest image quality, you can choose to uncompress the image data before it is outputted.

To Application:

Choose if you wish to compress the image data and transfer it from the TWAIN driver to the application. Note Bi-tonal images are normally compressed using CCITT standard called Group 4 (G4). Color and grayscale images are often compressed using JPEG technology. Move the [**Image Quality**] slider to the right or left to increase or decrease your image quality. Note the greater the image quality, the lower the compression level. Default is 50%.

Note that the compression depends on your image editing application. If your image editing application does not support the type of compression format, then the image of the compressed file will look abnormal.

From Scanner: (*Note: The availability of this feature varies due to scanner model.*)

Choose if you wish to compress the scanned image and transfer it from the scanner to the TWAIN driver.

Choice: Uncompressed, *Best Image Quality (Low Compression Level), Better Image Quality (Normal Compression Level), Normal Image Quality (High Compression Level). (*: Factory Default)

The Compression tab dialog box

Color Dropout Selection

The [**Color Dropout**] tab allows you to select either green, red, blue, or a color of your choice to remove the details of the selected color from a scanned image. This feature is used to sharpen your text when using OCR (Optical Character Recognition) software. Note this feature applies only to the gray or black and white image.

Choice: None, Auto, Remove Red, Remove Green, Remove Blue, Custom

- **None**: Does not remove any color.

- **Auto**: Automatically outputs the image with the details of the primary color removed.

- **Remove Red/Remove Green/Remove Blue**: Outputs the image with the details of the specified color removed.

- **Custom**: Specify the color you wish to remove by entering its RGB (Red, Green, and Blue) value respectively.

Advanced Options:

- Quality Mode: Range: 0~20. Default: 10

When [Quality Mode] is selected, you can determine the color to be dropped out using the [Filter Threshold] slider. A lower value will drop more of the selected color out, while a higher value will leave more of the selected color in.

- **Normal Mode**: Use an optimized setting to determine the color.

The Paper tab dialog box

Cropping

Cropping allows you to capture a portion of the document being scanned. Choice: Automatic, Automatic (36"), Fixed to Transport, EOP (End of Page) Detection, Automatic Multiple, Relative to Documents.

Options	Description
Automatic	Automatic adjusts the cropping window according to different document sizes and automatically straighten a skewed document. Use this option for batches of mixed-sized documents.
Automatic (36″)	Automatically adjusts the cropping window according to different document sizes smaller than 36" and automatically straighten a skewed image. Use this option for batches of mixed-sized document.
	<i>Note: The availability of this feature varies due to the scanner model.</i>

Fixed to Transport	This feature allows you to define the area or zone to be imaged. Use for batches of same-sized documents. If you select this option, you can use the arrow keys to define the x and y offset values, width and length to redefine your scanned area. The Display window will show image placement as you change the values.
EOP (End of Page) Detection	This feature allows you to define the area or zone to be imaged. Use for batches of same-width but different length documents. If you select this option, you can use the arrow keys to define the x and y offset values, width and length to redefine your scanned area. The Display window will show image placement as you change the values.
Automatic Multiple	This option allows you to place various sized documents such as photos, ID Cards, or business cards on the flatbed (if available) and lets you create multiple individually cropped images in one scan. Note: To correctly create multiple images, please make sure there is at least 12mm (0.5") of space between each document.
Relative to Document	This option allows you to crop different areas on your documents and deliver these images in B&W, Gray, or Color separately. For example, there are applications which require you to store the entire document in B&W and a part of the document in color to save storage space. This is useful for documents where a photograph or signature appears in a consistent area on the document such as resumes, and so on.

The following options are only available when **Fixed to Transport** is selected.

- **X-Offset** the distance from the left end of the scanner to the left edge of the scanning area.
- **Y-Offset** the position from the top end of the document to the top end of the scanning area.
- Width the width of the scanning area.
- **Length** the length of the scanning area.
- **Center:** automatically calculates the x-offset for center-fed feeding based upon document size selected.
- relocate the scan area by click the arrow key on the cross sign while retain the scan size. View the result from the Display window.

The Adjustment option is available when **Automatic** is selected.

 Adjustment —adds a positive/negative margin value Top/Bottom or toward left/right of the image. Adjustment is used when the automatic document feeder is used. Adjustment reduces the possibility of corner clipping on skewed images. To set Adjustment values, use the UP/Down buttons to select where you want to apply Adjustment values: Top/Bottom or Left/Right, and then select the amount of inches/mm/pixels applied. Select a value within the range of 0.00 to 1.00 / -1.00.

Relative to Document: (used for batches of same-sized documents)

This option allows you to crop different areas on your documents and deliver these images in B&W, Gray, or Color separately. For example, there are applications which require you to store the entire document in B&W and a part of the document in color to save storage space. This is useful for documents where a photograph or signature appears in a consistent area on the document such as resumes, and so on.

The following procedure describes how to reproduce the entire document in B&W and a portion of document (picture) in color.

- 1. On the Paper tab, choose "Relative to Document" or "Fixed to Transport" from the Cropping option.
- Choose your scan size from the Scan Area option. The selected scan size will be displayed in a red rectangular box. This is also the scan size of your entire document. (For example, ISO B5. If you have not chosen a scan area and leave the selection as None, then the default area will be the scanner's maximum.)

3. Click the Preview tab to display the Preview window. A black rectangular box appears to indicate the max. scan size your have just selected.

- 7. Check the B&W image from the Image Selection box to scan the entire document.
- 8. Click the Scan button to start scanning the document in two image types and sizes. (See the result in below.)

The entire document in B&W

The relative area in color

Other Paper Selection

Carrier Sheet Mode:

Check this option to automatically crop the scan window according to your document size when scanning non-standard document (fragile, irregular-size document) with a carrier sheet (optional). Note: The availability of this option varies due to scanner model.

Loading Documents Using a Carrier Sheet

A Carrier Sheet is a plastic sheet specifically used for loading non-standard document onto the scanner. It allows you to scan document that can not be scanned in the regular way. Also, documents larger than A4 size, such as A3 and B4, can be scanned by folding in half, inserting into the Carrier Sheet, and scanning in duplex mode. You can also scan documents that can be damaged quite easily such as photographs, or irregular size documents that are difficult to load directly such as clippings.

To scan document using a Carrier Sheet,

For documents larger than A4/Letter size, such as A3

- a. Fold the sheet to be scanned in half.
- b. Fold the sheet tightly and smooth out crease. Otherwise, the sheet may be skewed during scanning.

1. Open the Carrier Sheet and place the document inside.

Align the top of the document to the top of the Carrier Sheet (the printed area).

For documents larger than A4/letter size, such as A3

Align the top of the document to the top of the Carrier Sheet (the printed section) and the folded portion to the right edge of the Carrier Sheet so that the document fits into the Carrier Sheet at the upper corner.

For non-standard document

Center your document in the Carrier Sheet.

- 2. Load the Carrier Sheet with the gray section (printed section) facing downwards.
- Adjust the paper guides to the width of the Carrier Sheet.
 Adjust the paper guides so that there is no space between the guides and the Carrier sheet. Space between the guides and Carrier Sheet may cause the Carrier Sheet to become unaligned during scanning, and skew the scanned image.
- 4. Start the scan.

Notice:

- [Carrier Sheet] is available for the models that support the Carrier Sheet.
- Some functions are disabled when [Carrier Sheet] is checked.
- This option may not work properly on some applications.

Scan Area

Choose your desired paper size with the drop-down list box. Or you may select a custom paper size by clicking the **Scan Area** box and then click **Add** to include in the choice.

Choices are listed below:

Long Page (<118"):

When you need to scan documents whose length exceeds scanner maximum, please choose **Long Page**. Note if **Long Page** is selected, the **Multi-Feed Detection** will not be available. (Note: This option and the maximum allowable document length vary due to type of scanner.)

When **Long Page (<118")** is selected, be sure to specify your document size in the **Length** and **Width** field.

Notice when scanning long page document:

- 1. Pull out the extension in the ADF Paper Tray.
- 2. Secure enough space around the Output Tray to prevent the ejected paper from falling off the Output Tray.
- 3. To ensure the performance, in color mode, set the resolution to be 300 dpi or lower; in Black and White mode, set the resolution to be 600 dpi or lower.
- 4. Depending on your system environments, application, or your specified paper size, there may be insufficient memory to perform scanning.

OverScan

Overscan allows you to add a specific margin at top and bottom or right and left (Options vary based on the type of scanner) of the edge of the image. This is used to reduce possible corner clipping on the skewed images and often applied to a batch of skewed document to be scanned in the auto document feeder. Select a value between 0 and +5 mm. Note the overscan result will not be shown in the Display window and that the availability of the function varies based on type of scanner.

Pre-Feed

Choice: Enable, Disable. If enable is selected, you can set the amount of time the scanner starts pre-feeding your paper after your documents has been loaded into the feeder. The default is disable. Note: The availability of this option varies due to scanner model.

Transport Timeout

Set the amount of time the scanner will wait and then start auto scan after the first scan job is completed. If you have many separate documents need to be scanned at the same scan settings, this feature is especially useful. The default is 0. The value ranges from 0 to 30 seconds.

Note:

- 1. Within the specified timeout period, if you load your document to the feeder, the scanner starts scanning automatically.
- 2. If your scanner has a flatbed option and you place your paper on the flatbed, after the timeout period, you need to click the Scan button on the TWAIN user interface to start scanning.

Background SettingThis option allows you to set your scan
background. Choice: White Background, Black
Background.

Note: For a sheet-fed scanner with an auto document feeder, this option is currently available only in the "Auto crop" mode. For a scanner with a flatbed platen, this option is available either in the "Auto crop" or the "Fixed to Transport" mode.

White Background

Black Background

Multi-Feed Detection

Multi-Feed Detection allows you to detect overlapped document that go through the auto document feeder. Multi-Feed usually occurs due to stapled documents, adhesives on documents, or electro-statically charged document. Note : The availability of the function varies based on type of scanner.

nage P	aper N	Aulti-Feed Detection	Preview	Setting	Information		
	eed Dete	ection					
Add	ditional Le	ength Detection:		1	None		
Ultr	asonic D	etection					
		nning after Multi-Feed ti-Feed Paper:		Auto			
Multi-Fe	eed Alam	0.		C:\Windo	iws\Media\ding.wav	:	Browse
		Inches			•		
Unit:		Inches					

Additional Length Detection

Additional Length Detection allows you to define the length of document being multi-fed. This value indicates the additional length exceeding your scan area. The Display window will show the size of the document as you change the value. A value of 0 indicates no additional length detection. The Additional Length Detection is best used when scanning same-size documents in the auto document feeder.

Ultrasonic Detection

Ultrasonic Detection allows you to set overlapped document by detecting paper thickness between documents. Note : The availability of the function varies based on type of scanner.

There are two options available if Multi-Feed is detected.

• Stop Scanning after Multi-Feed

If this is selected, the scanner will stop the feeder and display the following Warning dialog box if multi-feed is detected.

Action:

- 1. Follow the instruction on the Warning dialog box to remove the rest pages on the feeder.
- 2. Click OK to close the Warning dialog box.
- 3. Scan the rest pages.

Clear the Multi-Fed Paper: Auto

If this is checked, once multi-feed is detected and scanning operation is stopped, the scanner will automatically clear the transport of the multi-fed paper. If this is not checked, once multi-feed is detected and scanning operation is stopped, you need to manually clear the transport of the multi-fed paper. Note: The availability of this option varies based on type of scanner.

• Multi-Feed Alarm

If a wave file is added, the scanner will make a sound alarm if multi-feed is detected yet no Warning dialog box will be displayed.

If "Stop Scanning after Multi-Feed" is selected, the scanner will stop the feeder.

If "Stop Scanning after Multi-Feed" has not been selected, the scanner will continue to scan till the end of your document.

Action:

- 1. If "Stop Scanning after Multi-Feed" is selected, follow the action described in the preceding section "Stop Scanning after Multi-Feed" on the previous page to complete your job.
- 2. If "Stop Scanning after Multi-Feed" has not been selected, rescan the pages where multi-feed is detected.

How to add the sound alarm :

- 1. Click the Browse button on the right side of the speaker icon. The Open dialog box appears.
- 2. Choose your wave file.
- 3. Click the Open button. The wave file is added.

Units

Defines the primary measurement system. **Inches, Millimeters,** and **Pixels** are available.

The Preview tab allows you to preview (a low-resolution scan) your image before final scan. This preview image lets you allocate your scan area. You can choose your scan area by the "Scan Area" drop down list box or placing your cursor on the Display window and dragging it diagonally on the Display window. Then, a red rectangle box will appear to indicate the selected area.

Note: If you choose "Automatic Cropping" on the "Paper Tab", then to select a scan area on the Preview tab is not allowed.

The Preview Tab

The Enhancement Tab

The Enhancement tab allows you to set following additional image processing settings.

Punch Hole Removal Punch Hole Removal Background Setting Background Processing: Nc Sensitivity: Fill Color W	ne	v

The Option tab dialog box

PunchYou can remove punch holes from the output scanned image whenHolescanning punched document. Note the availability of this featureRemovalvaries depending on your scanner model.

Original Output image **Punch holes can not be removed when:**

- Resolution is set lower than 150dpi
- The hole is near the edge of the document
- The holes are not aligned along the edge of the document
- Punch Hole Removal is available only when "Auto Crop" is enabled. If either "Fixed to Transport", "EOP (End of Page) Detection", "Automatic Multiple", "Relative to Documents" is selected from the Cropping option on the Paper tab, the Punch Hole Removal option will be disabled.

Shadow Removal

When **Flatbed** on the **Scan Source** option is selected on the **Image** tab, the **Shadow Removal** option will be enabled. Click to remove the shadow on the book spine when scanning a book.

	efore Shadow Removal	After Shadow Removal
AND	Set	Main control and any off any
		many and the second sec

Background Processing: The [Background Processing] option allows you to

smooth background color or remove it to make image clearer. The option is

especially useful for documents with color forms such as invoices.

Choices: None (default), Smooth, Removal

- None no background processing will be performed (default)
- **Smooth -** produces images with a more uniform background color. This option improves image quality.
- Removal identifies the background color and then removes it.

Sensitivity: Choice: 0, 1, 2, 3, 4. Default: 0

- The higher the value, the more background color will be kept.

Mode: Auto, Moiré

If [Smooth] is selected in the [Background Processing] option, then the choices

for the [Mode] option includes Auto, and Moiré.

- Auto uses the factory preprogrammed mode to proceed background smoothing.
- **Moiré** Remove the moiré patterns that appear on the background of the image when scanning printed material.

If [Removal] is selected in the [Background Processing] option, then the [Mode]

option will be replaced with [Fill Color]. Choices: White, Auto.

- White identifies the background color and substitutes it with white.
- **Auto** identifies the background color and substitutes it with the color of the largest background zone.

Background Processing: None

Original

Edge Fill: 5mm (Black)

Despeckle

Occasionally small dots or specks appear in the background of a scanned image. Remove unwanted speckles provides a cleaner image for OCR (Optical Character Recognition) processing, and also helps to reduce compressed file size.

Define the speckles (also known as image noise) you wish to remove by specifying its number (size) and radius (range). The measuring unit is pixel. The higher the number, the more speckles will be removed.

Before Despeckle

(noise number:0, noise radius:1)

After Despeckle

(noise number:22, noise radius:10)

Note:

•The function is currently available for Black and White image only.

•To scan at rated speed, it is recommended to set the noise radius up to 10 pixels.

Line Removal: When **Black and White** image mode is selected on the [**Image**] tab, the [**Line Removal**] option will be enabled. Line Removal erases lines on the image and then reconstructs characters so the OCR (Optical Character Recognition) accuracy can be improved.

Choices: None, Form, Horizontal, Vertical

None – the default mode which does not remove any line.

Form – remove any form in the document.

Horizontal – select [**Horizontal**] and then enter the length of horizontal line to remove only the horizontal line exceeding your specified length.

Vertical – select [**Vertical**] and then enter the length of vertical line to remove only the vertical line exceeding your specified length.

aye	Paper	Multi-Feed Detection	Preview	Rotation	Enhancement	Setting	Infor	mation	
Rotat	ion								
Rotation Degrees :		rees :	None			▼ M	ode:	Quick	w
Image	e Control	Options

Flip S	ide Rotat	tion							
A	5	ESTAT T		F	<u>–</u>				
1	A^{A}	Book			AL O	Fanfold			
mag	e Control	Ontions							
	Mirror	options							

The Rotation tab allows you to set the following image rotating options:

Rotate Image Choose the rotation angle from the drop down list if you wish to rotate your scanned image.

Choice: None, 90°CW(clockwise), 90°CCW(counter clockwise), 180°, Auto based on contents. Auto rotate every even page.

Auto based on contents: Automatically rotate images based on the contents of document. When **Auto based on contents** is selected, its modes

will be enabled to let you select more options.

Mode: Quick, Full Text, Complexity

Quick – the default mode to let you rotate images at the fastest speed.

Full Text – the enhanced mode for documents with mixed text orientation.

Complexity – the enhanced mode yet at the slowest speed for document with complex image or text orientation.

Auto rotate every even page:

Automatically rotate 180° on every even page. This is especially useful when you scan the inside pages from a book. As a result, if you choose "Flatbed (book)" from the "Scan Source" option, "auto rotate every even page" will be selected as default.

Note: This option varies based on type of scanner.

Split Image By splitting an image, two separate images are created horizontally or vertically. This is useful for documents containing two pages per image when you want to save them as two images (one page for one image). Choice: None, Horizontal, Vertical. Default is None.

Horizontal: Divide one image into the upper half and the lower half.

Vertical: Divide one image into the left half and the right half.

Split Horizontally

Split Vertical

Flip SideSelect "fanfold" to rotate the image of the reverseRotationside to 180 degrees.

This is applied to double-sided document which are viewed in portrait are sometime fed into the scanner in landscape or vice versa.

Choice: Book, Fanfold.

If "Book" is selected, the image of the reverse side will not be rotated.

The following illustration shows the documents which should be viewed in portrait are fed into the scanner in landscape

Image ControlCheck the Mirror box if you wish to reverse the rightOptionand left side of your image.

Original

The Mirror Effect

The Separation Tab

The Separation tab allows you to enable the detection engine to detect the blank page, barcode, and patch code and then notify the software application which supports document separation to separate your multi-page documents. Choices: Blank Page Removal, Barcode Detection, Patch Code Detection.

nage	Paper	Multi-Fee	d Detection	Preview	Rotation	Separation	Enhancemer	t Setting	Information	
Blank	Page R	emoval								
			al Threshold:			-	-0		50 %	
		go Homore	TTTO TOTO.				1 Y Y Y Y		8	
Barco	de Dete	ction								
E	nable			Select	Barcode Ty	ype	Zone :	All	Ŧ	
Pater	code D	ataction								
	nable	election								
	nable									

Blank Page	Choices: None, Blank Page Removal Threshold,
Removal	Image Size.
	None – Do not remove the blank pages.
	Threshold - Move the slider to the left or right to
	define your threshold for the blank page.
	Image Size – Range: 1~ 10000 KB. Specify your
	desired image size to detect the page as a blank
	page. For example, if 3 KB is selected, any page less
	than 3 KB will be recognized as blank page.
Barcode	Check [Enable] to detect barcode and notify the
Detection	software application for advanced processing. Please
	note the whole document will be checked and no
	specific detection area needs to be designated.

When the bar code has been detected successfully \cdot a file [avbarcode.ini] will be

created and stored in the following path:

Windows XP: C:\Documents and Settings\All Users\Application

Data\%PRODUCTNAME%

Vista, Windows 7, Windows 8, Windows 10: C:\ProgramData\%PRODUCTNAME%

Barcode Types:

The following barcode types can be detected.

Two-dimensional codes

- Aztec
- DataMatrix
- PDF417
- QR Code

One-dimensional barcodes:

- Add-2
- Add-5
- Australian Post 4-State
- BCD Matrix
- Codabar
- Code 128
- Code 32
- Code 39
- Code 93
- DataLogic 2 of 5
- EAN 128
- EAN-13
- EAN-8
- GS1 DataBar
- Industrial 2 of 5
- Intelligent Mail
- Interleaved 2 of 5
- Inverted 2 of 5
- IATA 2 of 5
- Matrix 2 of 5
- PostNet
- Royal Post 4-State
- UPC-A
- UPC-E

Barcode Zone:

Specify the barcode zone to be detected.

Select **All** to checks the whole document and detects barcodes. Or you may speed up the process by specifying a detection area since only the specified area is checked.

Choice: All, Top, Bottom, Left, Right, Bottom Right, Bottom Left, Top Right, Top Left

Choice for barcode zone on a page:

All	Тор	Bottom	Left	Right
Bottom Right	Bottom Left	Top Right	Top Left	

Note:

- Recommended resolution: 200~600 dpi for regular barcode, 300~600 dpi for QR code
- Skewed barcodes may not be recognized correctly.
- Using the same sheet repeatedly may decrease the recognition accuracy due to accumulated dirt on the sheets. If the sheet is not recognized correctly or gets smudged, replace it with a new sheet.

Patch code Detection:

Check [Enable] to detect patch codes and notify the software application for

advanced processing.

A patch code is a pattern of parallel, alternating black bars and spaces (i.e. a barcode) that is printed on a document. Patch code sheet is most commonly used as a document separator in a stack of document.

You can find various sizes of patch codes (PDF) by choosing [Start] menu>[All Programs]>[Avision Scanner Series]>[Patch code] in succession.

Simply print the PDF file to produce the patch code sheet. Insert the patch code sheets to wherever you want the file to separate.

Patch code sheet

Notes to print the patch codes:

- Use blank white paper.
- Set the scaling to 100%. The sheet is not recognized correctly when printed in a size smaller than the original.
- Do not use toner saving mode. The sheet is not recognized correctly when the print is too light.
- Do not use thin paper in order to avoid bleed-through from the back.
- When you copy a patch code sheet that you printed out, make sure to copy by the same size and brightness as the original copy.
- Use the same sheet repeatedly may decrease the recognition accuracy due to accumulated dirt on the sheets. If the sheet is not recognized correctly or gets smudged, replace it with a new sheet.

The Setting tab allows you to set the following settings:

The Setting tab dialog box

Energy Saving Control	Check the Enable Energy Saver box and move the slider to set the amount of time to start the energy saver after your last action. The range is from 1 to 60 minutes.
Enable Power	Check the Enable Power Off box and move the slider to set
Off	the amount of time to automatically turn off the scanner after
	your last action. The range is from 1 to 480 minutes. The
	default is 240 minutes (4 hours). Note the value of "Power
	Off" has to be greater than or equal to the value of "Energy
	Saving".

Cache	Mode: None, Page Number, Memory Size.
	This option allows you to assign a specified memory
	size from the available RAM to process the image
	data. By specifying a smaller memory size, you can
	free more memory for other applications you are
	running. By specifying a larger memory size, you can
	have more memory to process the image data
	especially when you have a large amount of
	documents needed to be scanned.
	You can also specify your memory size by the page
	number. For your information, an A4 color document
	scanning at 300 dpi consumes approximates 24MB.
	Image Count
	When the selected cache mode is "none", the image
	count option allows you to assign number of pages
	you need to scan. For example, if you wish to scan the
	first two pages, simply move the page slider to 2, and
	the scan action will be stopped when the scanning of
	the first two pages have been completed.
Show	Check and the scanning progress bar will be shown
Scanning	during scanning.
Progress	
Show	Check to show the warning messages such as "ADF
Warning	pad count exceeds 50,000 scans (the number varies
Message	based on type of scanner). Please replace the ADF pad
	and reset the pad count."
Save Settings	Check to save your scanner properties settings after
after Closing	leaving the dialog box. Next time when you open the
	Scanner Properties dialog box, the previously saved
	settings will be shown.

The Imprinter Tab

The Imprinter tab allows you to print alphanumeric characters, date, time, document count and custom message on your scanned image if digital imprinter is selected or at the back of your document if external imprinter is selected.

nage	Paper	Setting	Imprinter	Information						
🔲 Dig	gital Impri	inter

The Information tab displays the following system and scanner information.

The Information tab dialog box

The "Report" button :

If you encounter any error message while using the scanner, click the Report button. A report.txt file [Windows XP: C:\Documents and Settings\All Users\Application Data\%PRODUCTNAME%; Vista, Windows 7, Windows 8, Windows 10: C:\ProgramData\%PRODUCTNAME% (C: system drive)] will be generated. Please send this file to the nearest service center for trouble shooting.

The "Reset Roller Count" button :

After scanning over a recommended number of pages (refer to subsequent section 7.4 Replacing the ADF Roller) through the ADF, the ADF roller may be worn out and you may experience problems with document feeding. In this case, it is highly recommended to replace the ADF roller with a new one. (Note the replacement of the ADF roller has to be performed only by authorized service center. Therefore, please return your scanner for roller replacement.) After replacing the ADF roller, click the "**Reset Roller Count**" button to reset the roller count.

Note :

The lifetime and the replacing procedure vary based on type of scanner.

9 ISIS Interface Operation

* Please refer to the preceding chapter, Scanner Installation, to install ISIS scanner driver. You may start your ISIS-compliant software application to scan via the ISIS user interface.

The ISIS driver operation method is similar to the TWAIN's. Every function on the ISIS interface screen is briefly described as below:

Mode:	Brightness	OK
Black and White	Manual C Automatic	Default
Djther:	_ 128 _	Derduik
Halftone 4		Cancel
Dots per inch:	Darkenighten	Area
300		
Page Size:	Contrast	
A5 - 14.8 x 21.0 cm	Manual C Automatic	
PIXDFLT Version 55.1.260.851 Avision PXN Driver V2.01.062402	128	

Mode: Select one of scan modes, including B&W, gray, color options.

Dither: 5 halftone levels available, can be disabled.

Dots per inch: Select your desired resolution.

Paper Size: Select your desired paper size.

Brightness: Adjust your scan image brightness or darkness.

Contrast: Adjust the range between the darkest and the lightest shades in the image.

Default: Click to reset all settings.

Area: Select your desired scan area or position.

10 Scanning and Sending the Scanned Images to Your Computer (BM2 Air)

Before You Begin:

Before you begin using the function of [**BM2 Air**], please make sure you have already installed the scanner driver, Button Manager V2, and connecting to the scanner to your computer via a USB cable or an ethernet cable as described in the preceding section, chapter 7 Using the Product as a Regular Scanner.

Installing Button Manager V2

Button Manager V2 provides you an easy way to scan your document and then link the scanned image to your designated software application. All this can be done by a simple touch of the button on the scanner. Yet, before you scan, it is recommended to check the button configurations first to ensure a proper file format and a destination application.

Checking the Button Configurations before Scanning

1. Button Manager V2 runs from the system tray. After Button Manager V2 and the scanner driver are properly installed, Button Manager V2 is started and the Button icon will be displayed on the system tray at the bottom right corner of your computer screen.

2. Left-click the Button Manager V2 icon to prompt the following Button Panel.

The Button Panel

3. The Button Panel shows the first five scanning buttons. Right-click the button (function) you wish to check. The Button Properties window appears.

	ſ	- Name of the Selected Button	
	Button Properties - i	Scan (OCR)	
Button	Basic Image Adjus	stment Color Dropout Image Processing More Settings	
Name	iScan (O	CR) Scan Parameters Resolution(dpi): 300

the scanned image	File Name: File Format:	Image ##### More OCR(For iScan Only) Properties	
Scan To destination and settings	Destination: Description:	Setup Open your application, scan and insert the scanned image or editable text (after OCR) directly to your application.	
OCR settings	OCR Language: OCR Zone: No. of Recognized	Chinese Traditional Scan Count: 0 None Keyword: Sample d Characters After Keyword: 5	
		OK Cancel	

If you wish to change the setting, use this window to reset the setting for the file format, destination application, or other scan settings.

4. Click the OK button to leave the window.

Scanning From One Touch of the Buttons

- **1.** Adjust the paper guide for the width of paper and load the document with their tops into the automatic document feeder.
- 2. Use ▼ to scroll down to [BM2 Air] on the LCD display.
- **3.** Check the button (function) number on the LCD screen to ensure if you are selecting the proper scan settings and destination application. (For example, if you wish to scan with button (function) 3, "Scan to App", which opens Microsoft Paint and displays the scanned image in the window of Microsoft Paint, the LCD screen should show "Function 3").
- **4.** Press the **Scan** button on the scanner.
- **5.** After the scanning is finished, the Microsoft Paint software will be launched and the scanned image appears in the main window of Microsoft Paint as below.

	General	Document feeding mode	Flatbed
9	Specifications:	Technology

	Specifications:	Color copy speed	
		B/W copy speed	
		Copy resolution	
		Copy scaling	
		Multiple copies	

Note:

1. For details information on how to use the Button Manager V2, please refer to the user's manual in the supplied CD.

2. You may also use Button Manager V2 on your desktop by starting Button Manager V2 from All Programs or double clicking the Avision Scanner Utility from the Control Panel.

11 Troubleshooting

Clearing Paper Jams

In the event of a paper jam, follow the procedures below to remove the paper:

- **1.** Press the ADF Release Button on the right side. Gently open the Scanner Front Door to the left.
- 2. Carefully pull the paper out of the ADF unit.

3. Close the scanner front door. Your Scanner is now ready to use.

Questions and Answers

Question:	Paper becomes jammed during scanning.	
Answer:	 Open the front door. Pull out the jammed paper carefully. Close the front door. 	

Question:	More than one sheet of paper are fed into the scanner.	
Answer:	1. Open the scanner front door.	
	 Remove the multi-fed sheets. Close the front door. Flatten the corners and edges. Loosen the paper before putting it into the paper guide again. Check the feeding roller condition. If necessary, follow the cleaning directions and perform the cleaning. 	

Question:	Paper becomes skewed in the scanner.	
Answer:	 Use the slide guide to keep the paper path straight. Check the condition of the feeding roller. If necessary, follow the cleaning directions and perform the cleaning. 	

Question:	Why does my scanned image always come out too dark?	
Answer:	 Please adjust the screen settings to SRGB. Please adjust the brightness settings on the screen from application software.

12 Maintenance

Cleaning the Touch Screen

Wipe the Touch screen Monitor with a wet cloth first then wipe it with a dry cloth.

Warning:

Do not use liquids, household cleaners, or neutral detergents, as they may damage the touch screen.

Cleaning the ADF

After using the scanner for a long period of time, the rollers and glass inside the scanner may become contaminated with ink, toner particles or paper dust. It is necessary to perform routine cleaning to ensure the optimum image quality and performance. As a guideline, please clean the rollers and glass after first 4,000 to 5,000 scans and then perform the cleaning on a weekly basis. Note that the guideline varies according to the type of documents you are scanning.

Tip! If documents do not feed easily, if several documents feed at the same time or if streaks appear on the scanned images, it is time to clean your scanner.

The Cleaning Procedures

- 1. Soak a clean cloth with some isopropyl alcohol (95%).
- 2. Press the ADF Release button to open the front door to the left. Wipe and rotate the ADF Roller until the surface is completely removed from dust.

- 3. Wipe the rubber part of the ADF pad. Be careful not to damage the pick springs.
- 4. Close the scanner front cover. Your scanner is now ready for use.

Cleaning the Glass

- **1.** Press the ADF Release button. Open the front door to the left.
- 2. Wet a clean cloth with some isopropyl alcohol. (95%)
- **3.** Wipe the glass and the white area as illustrated below to rid the dust or dirt.

Cleaning the Ultrasonic Sensors

If the scanner sometimes fails to detect multi-feed via ultrasonic sensors, it is possible that paper dust or dirt may be accumulated on the surface of the ultrasonic sensors. Please follow these steps to clean the sensors.

- 1. Press the ADF release button. Open the front door.
- 2. Wet a clean cloth with some isopropyl alcohol. (95%)
- 3. Gently wipe the dirt and dust off the surface of the ultrasonic sensors.

Note:

If it is difficult to clean, use a cotton swab.

The availability of ultrasonic sensor varies according to your scanner model.

Replacing the ADF Reverse Roller

After scanning approximately 100,000 pages through the ADF, the ADF Reverse Roller may be worn out and you may experience problems with document feeding. In this case, you may need to replace a new ADF reverse roller. For ordering the ADF roller, please consult your nearest dealer and follow the procedure below to replace it.

Disassembling Procedure

- **1.** Press the ADF Release button.
- 2. Gently open the ADF Front Door to the left.
- 3. Hold the Reverse Roller Cover with your fingers as shown and place it down.

4. Press the right end of the Friction Roller externally to detach it from the slot and then detach the left end from its hole.

5. Remove rollers from the shaft.

Reassembling Procedure

1. Insert the new rollers to the shaft.

 Grab the right end of the reverse roller (flat side facing Up) and insert it to its original place.

- **3.** Insert the left end of the Reverse Roller to the hole of its original place.
- **4.** Insert the right end of the Reverse Roller to its slot.

5. Close the Reverse Roller Cover.

6. Close the ADF Front Cover.

Replacing the ADF Roller

After scanning approximately 200,000 pages through the ADF, the ADF rollers may be worn out and you may experience problems with document feeding. In this case, you may need to replace a new ADF roller. For ordering the ADF roller, please consult your nearest dealer and follow the procedure below to replace it.

Disassembling Procedure

- **1.** Press the ADF release button to open the front door.
- **2.** Pull the center of the roller cover to open it.

3. Move belt **UP** as indicated.

4. Move the tab of the ADF roller **DOWN** as indicated.

5. Detach the right end of the ADF roller from the scanner and remove the ADF roller.

Assembling Procedure

1. Insert the left end of the ADF roller first to its slot and place the ADF roller to its proper position.

2. Move the tab of the ADF roller **UP**.

3. Pull the belt DOWN.

4. Close the ADF roller cover. A snap-in sound could be heard if correctly installed.

*Note:

- Consumables must be replaced regularly. It is recommended to purchase new consumables in advance so that they can be replaced before the end of their life time.
- The replacement cycle is based on the use of A4 (80 g/m2 [20 lb]) wood-free paper or plain paper. The actual cycle varies according to the type of used paper and how frequently the scanner is used and cleaned.
- Use only the specified consumables.
- To purchase consumables, contact the store where you purchased the scanner or an authorized scanner service provider.

All specifications are subject to change without notice. For more detailed information, please refer to our web site at www.avision.com
